The Structure of the CPI

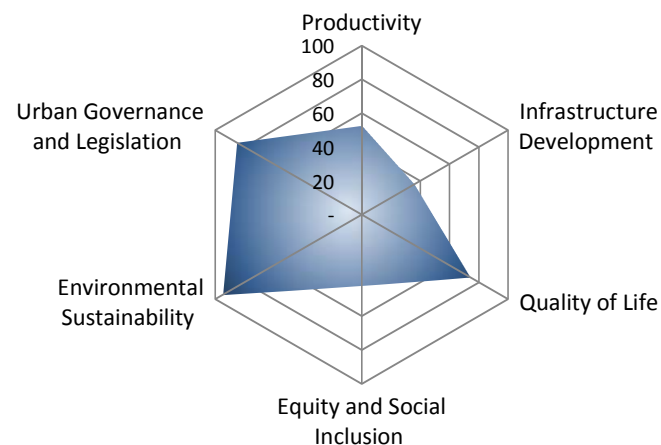

The CPI consists of six dimensions. Each dimension has a series of subindices or dimensions, which in turn include numerous indicators that allow specific index calculation. In this sense, the CPI produces six subindices related to the six dimensions of prosperity: Productivity, Infrastructure Development, Quality of Life, Equity and Social Inclusion, Environmental Sustainability and Urban governance and Legislation. The aggregation of these six sub-indices generated a consolidated value representing the CPI.

CPI Results

	CPI
Productivity	52.50
Infrastructure Development	35.77
Quality of Life	74.24
Equity and Social Inclusion	42.27
Environmental Sustainability	94.90
Urban Governance and Legislation	85.28
City Prosperity Index	60.22
