# CPI Result of Mangan

UN-Habit

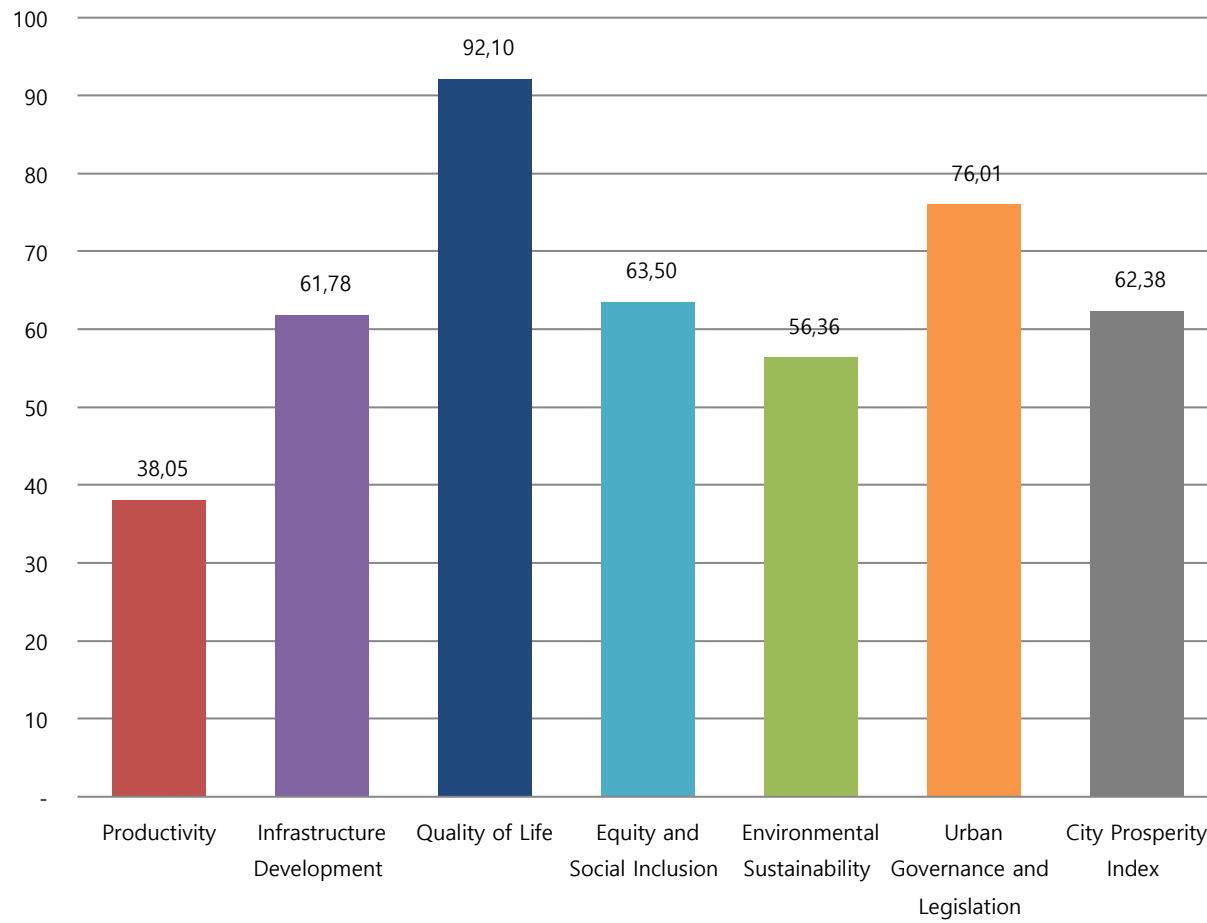

## The Structure of the CPI

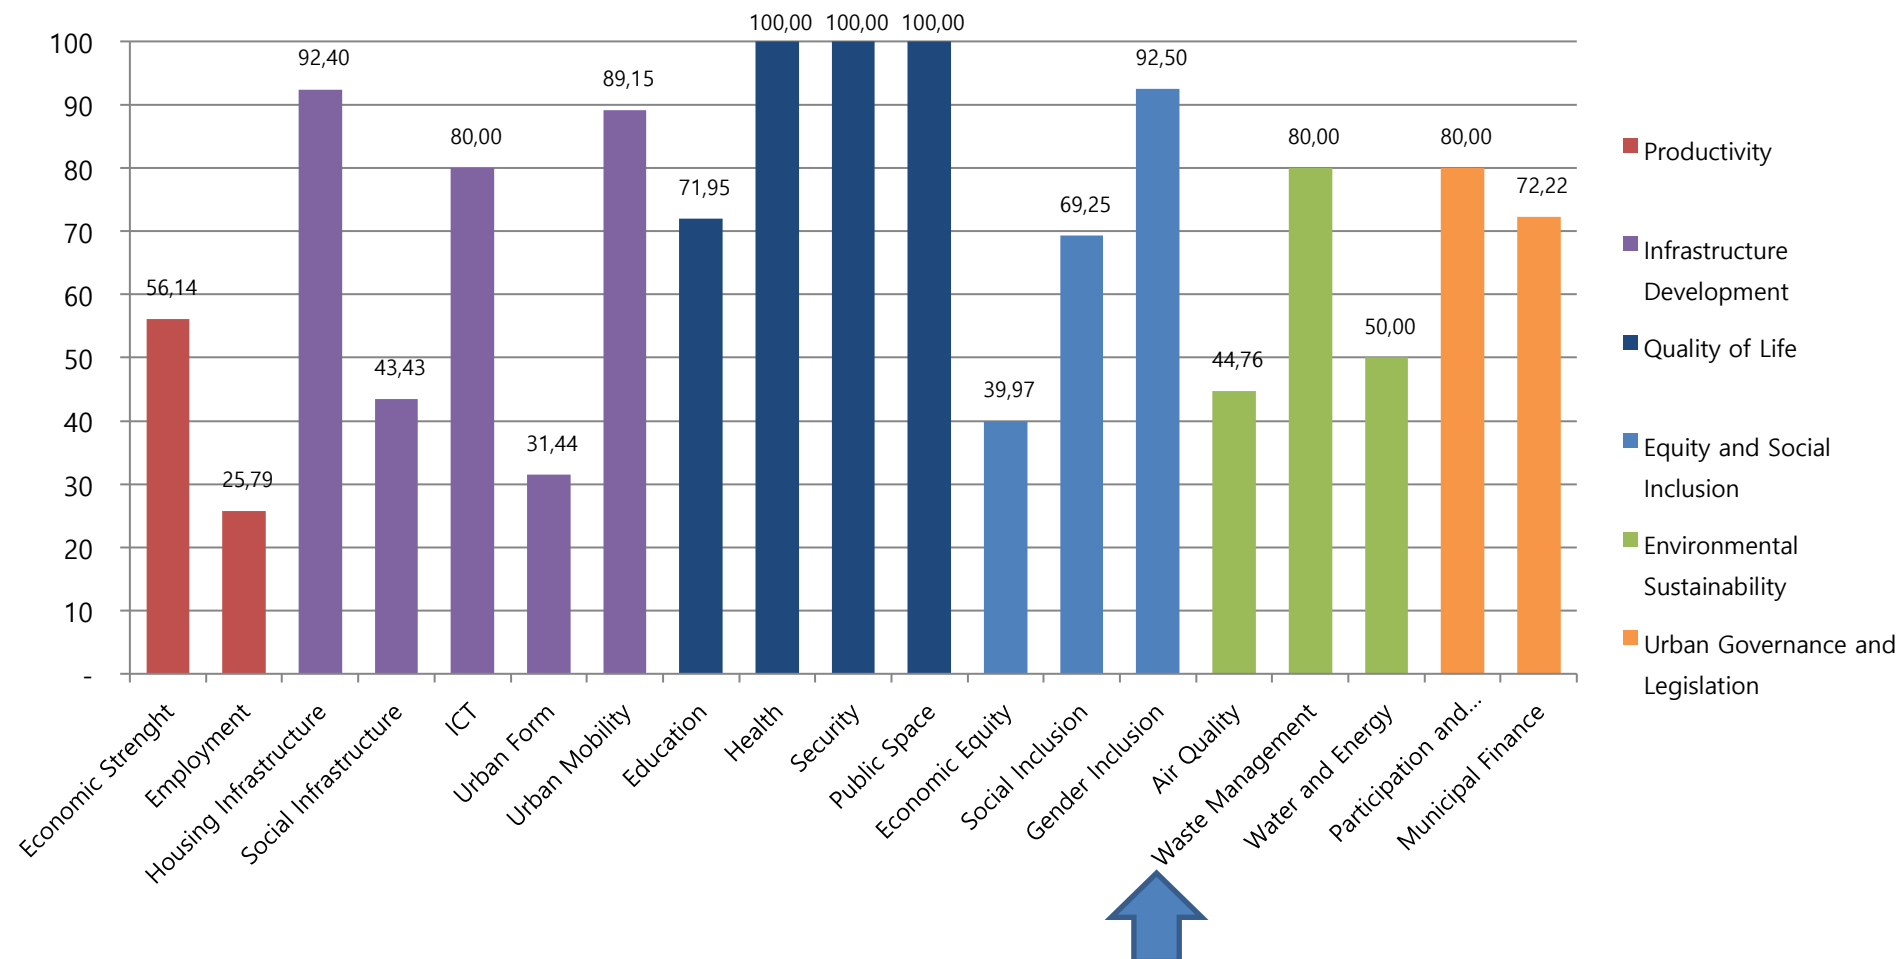

The CPI consists of six dimensions. Each dimension has a series of subindices or dimensions, which in turn include numerous indicators that allow specific index calculation. In this sense, the CPI produces six subindices related to the six dimensions of prosperity: Productivity, Infrastructure Development, Quality of Life, Equity and Social Inclusion, Environmental Sustainability and Urban governance and Legislation. The aggregation of these six sub-indices generated a consolidated value representing the CPI.

## CPI Results

	CPI
Productivity	38.05
Infrastructure Development	61.78
Quality of Life	92.10
Equity and Social Inclusion	63.50
Environmental Sustainability	56.36
Urban Governance and Legislation	76.01
City Prosperity Index	62.38

## City Prosperity Index

# Background

- Although Sikkim is doing quite well in Solid Waste Management, it is aiming to achieve 100% in waste management. So that it can maintain its status of being one of the cleanest tourist destination.
- Working on the lines of national government policy i.e. Swachh Bharat Mission(Urban).

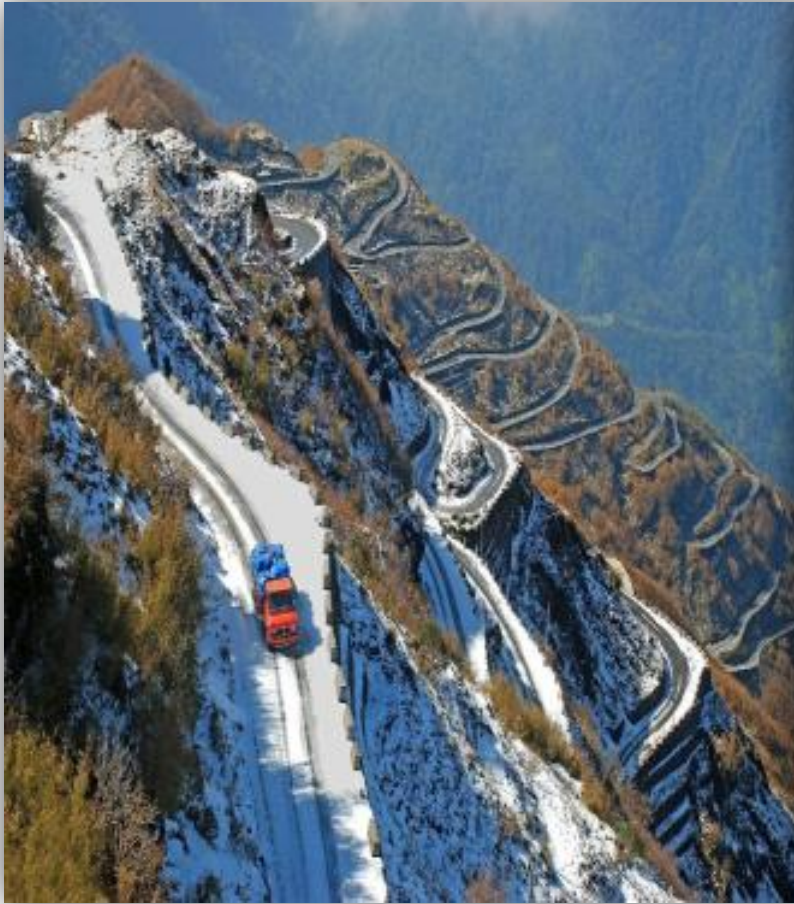

# Action Planning Goals

- 100% waste collection
- Source segregation

# Action Planning for achieving Goals

- Deploying bag packers for collection in areas with no road access.
- Increasing the number of garbage collection vehicle
- Awareness drives
- Imposing fines for littering
- Supply of Eco bins for wet wastes/kitchen waste
- Buy back policy for manure produced from Eco Bins
- Eco Banks
- Sanitary landfill
