# How are you?

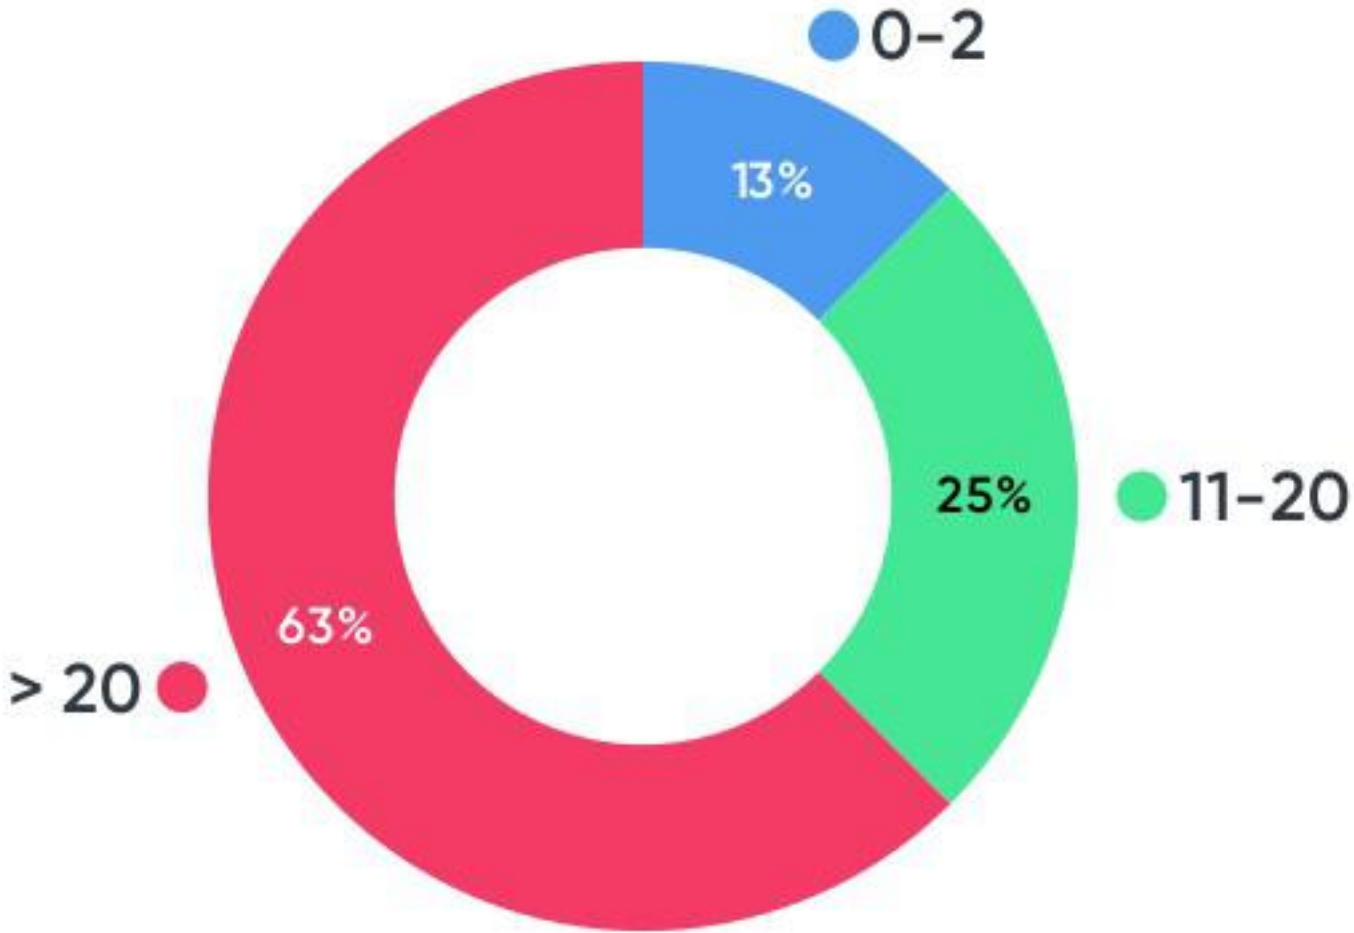

# Please rate the following:

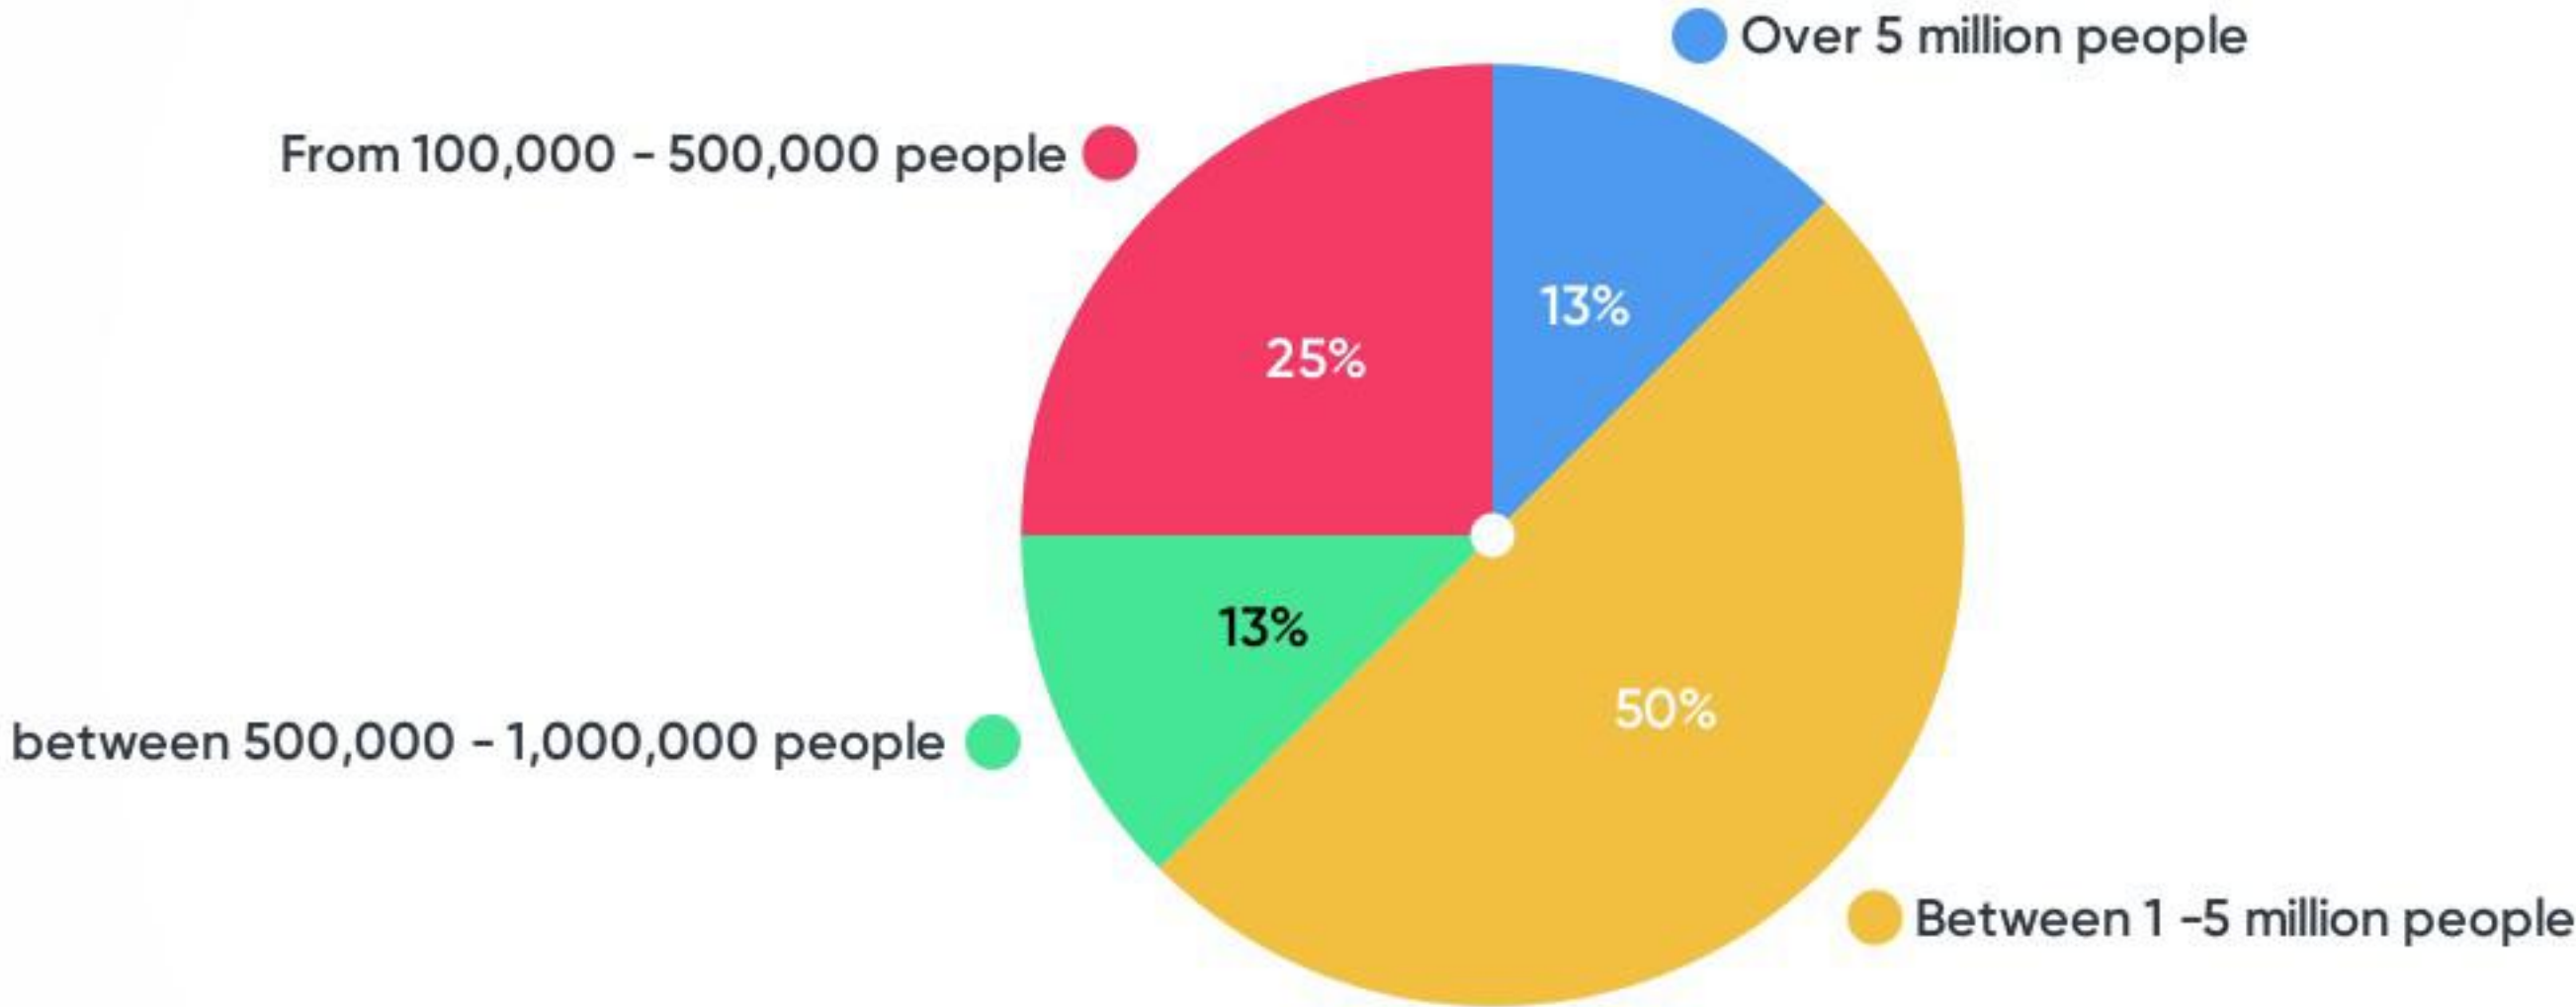

# You are...

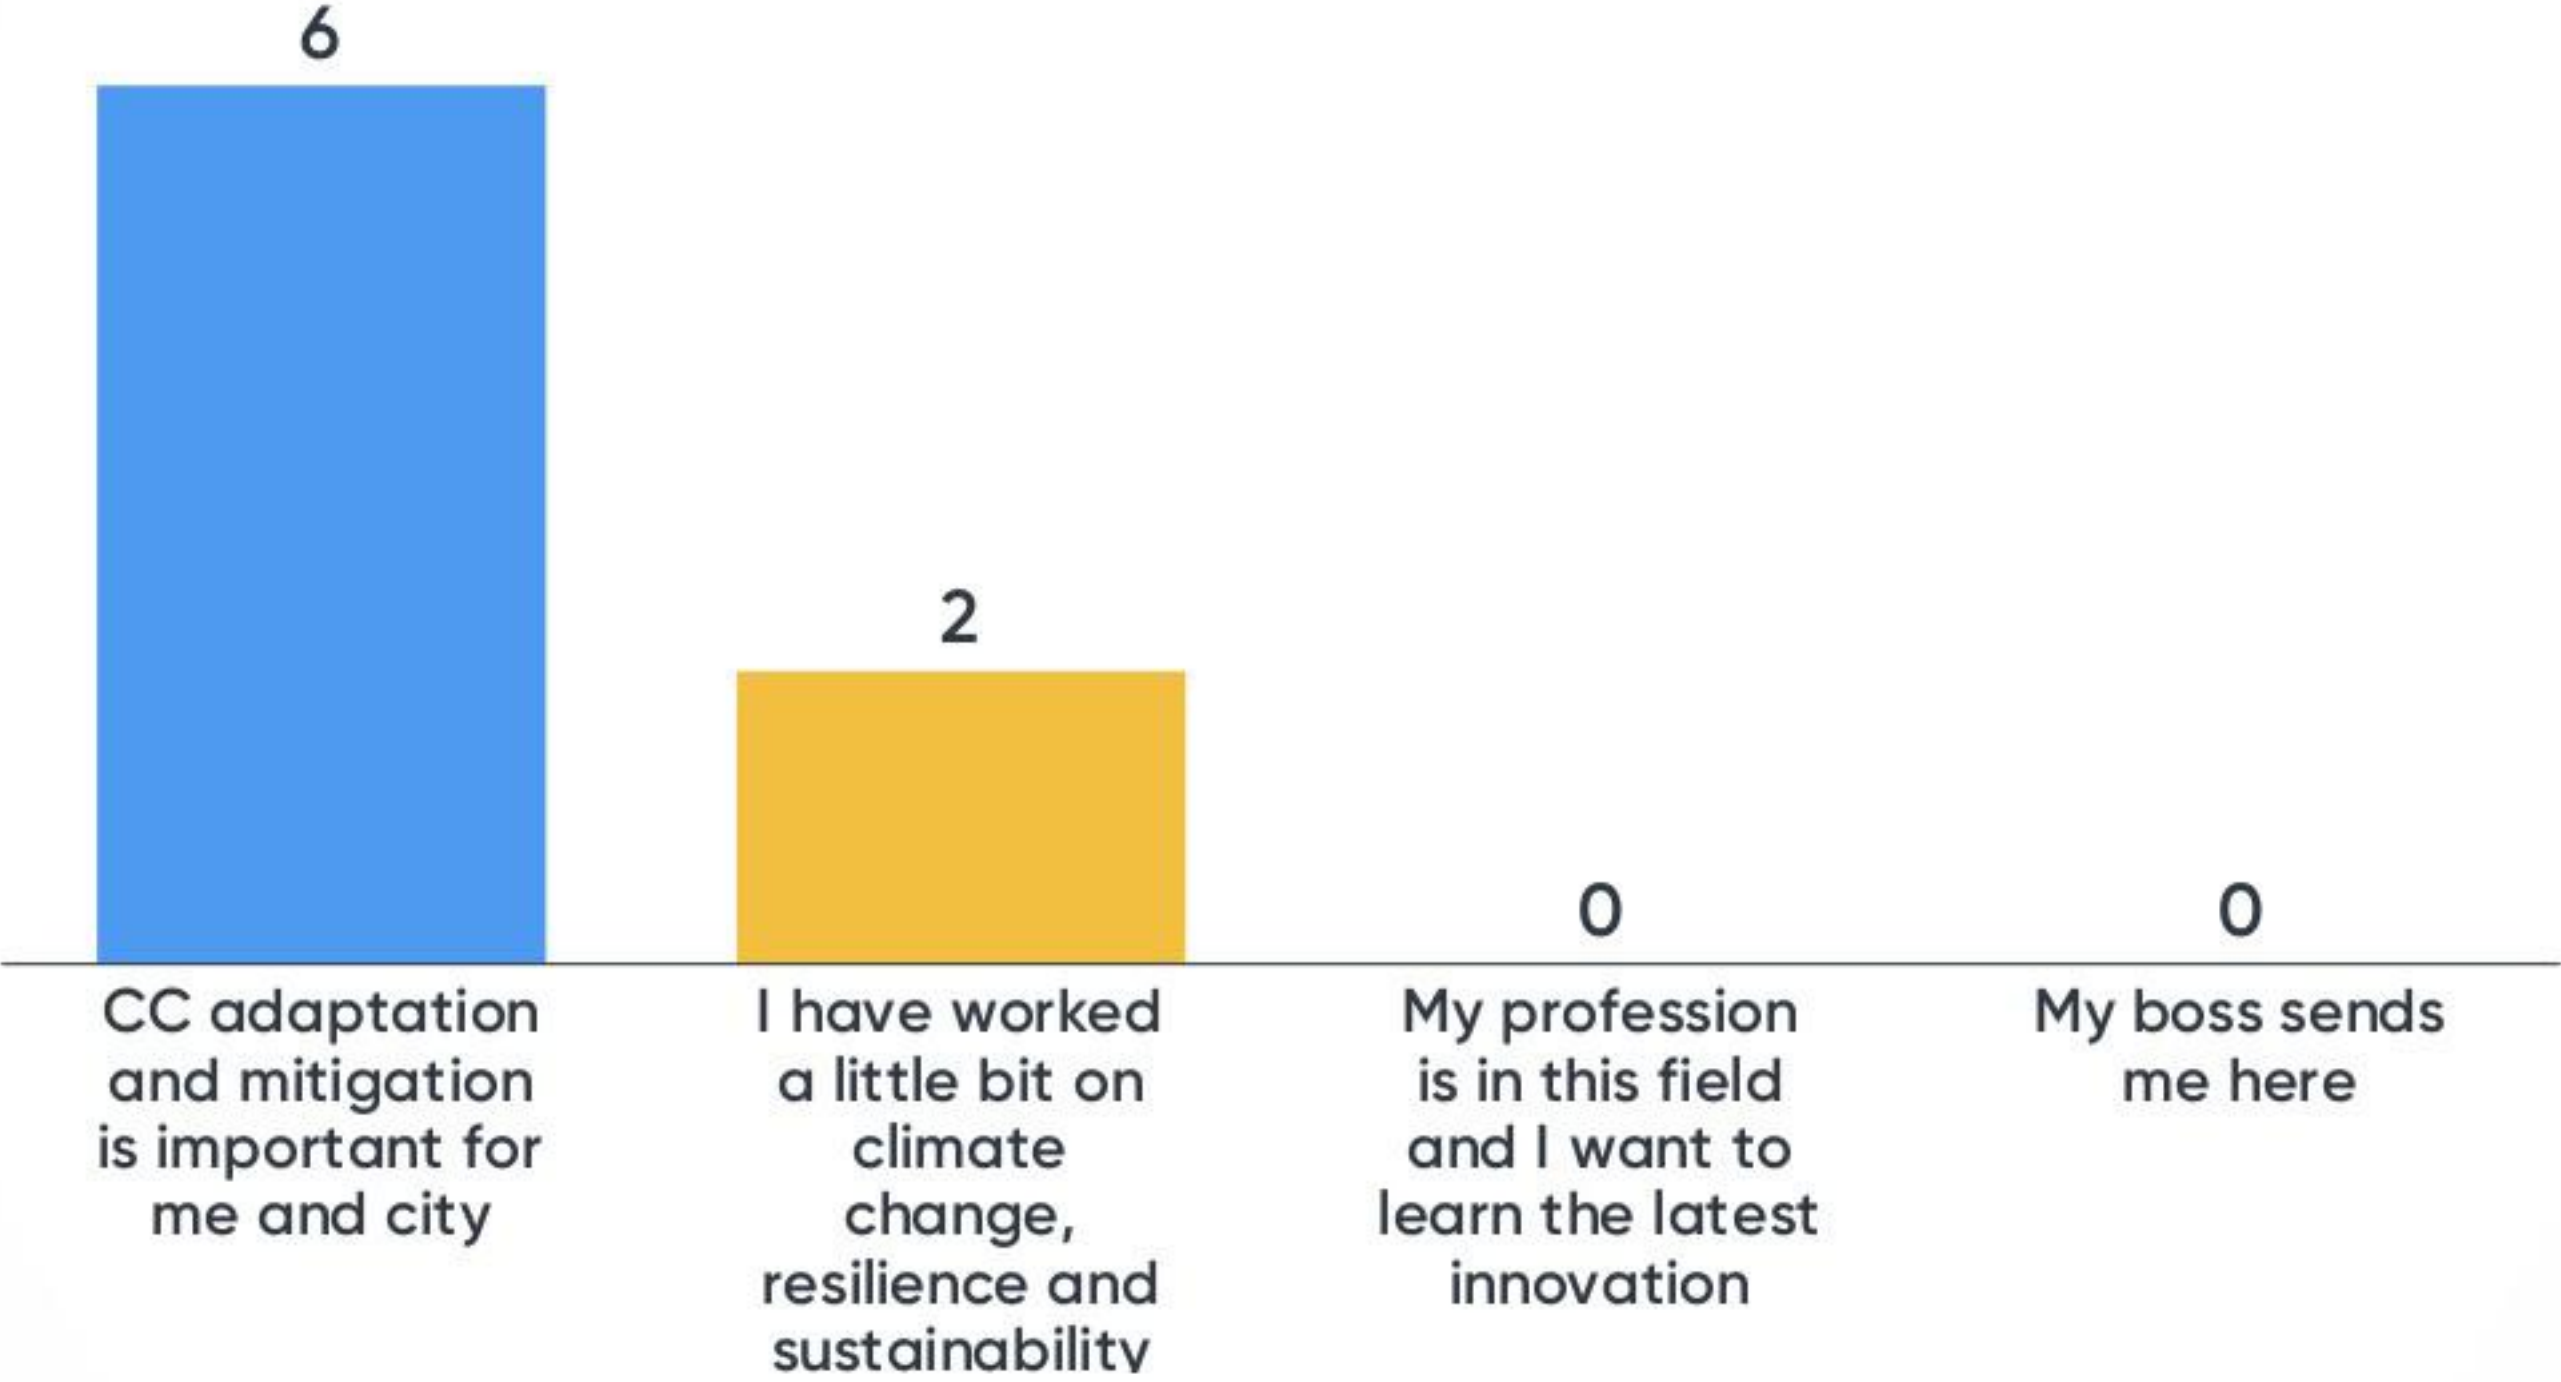

# How many years of working experience do you have?

# My city has....

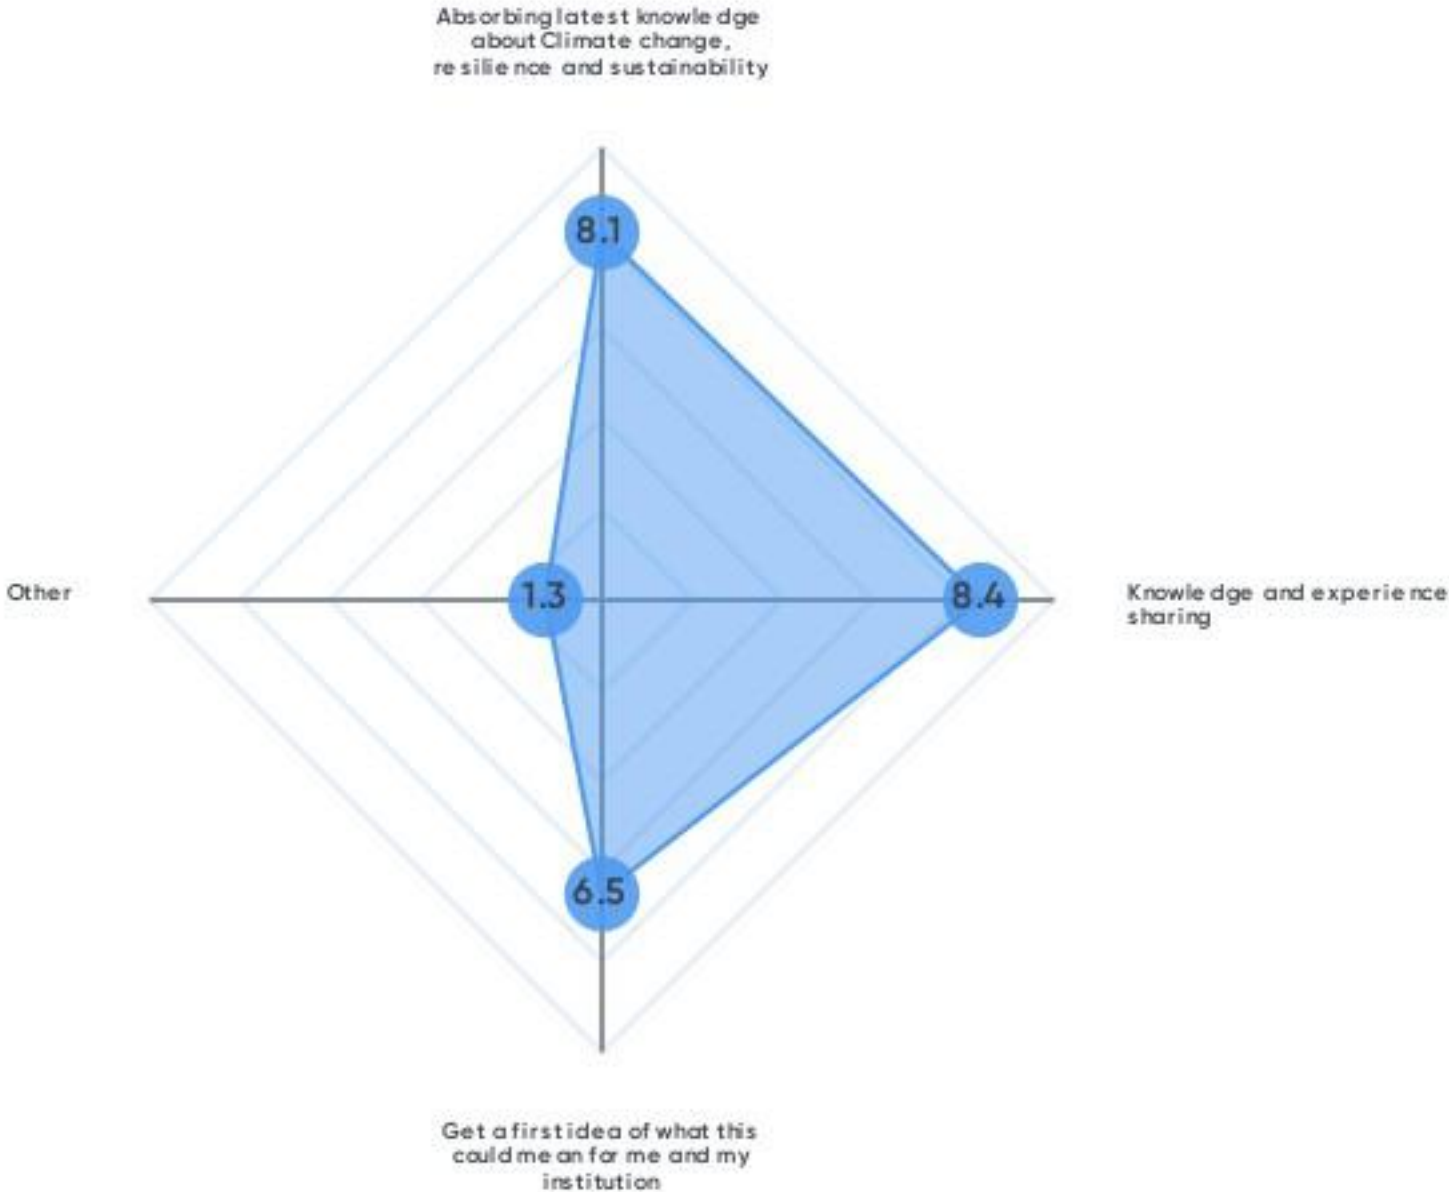

# Why did you apply for the training?

# What are your expectations from the training?

# What else are you expectations from the training?

Understand the roots of problems and the different solutions applied in different contexts

Guidance for seeking funding for climate related projects

Knowledge sharing and knowledge network development

Learn about good practices around the world.

Learn how to mobilize resources at local level to address climate changes issues

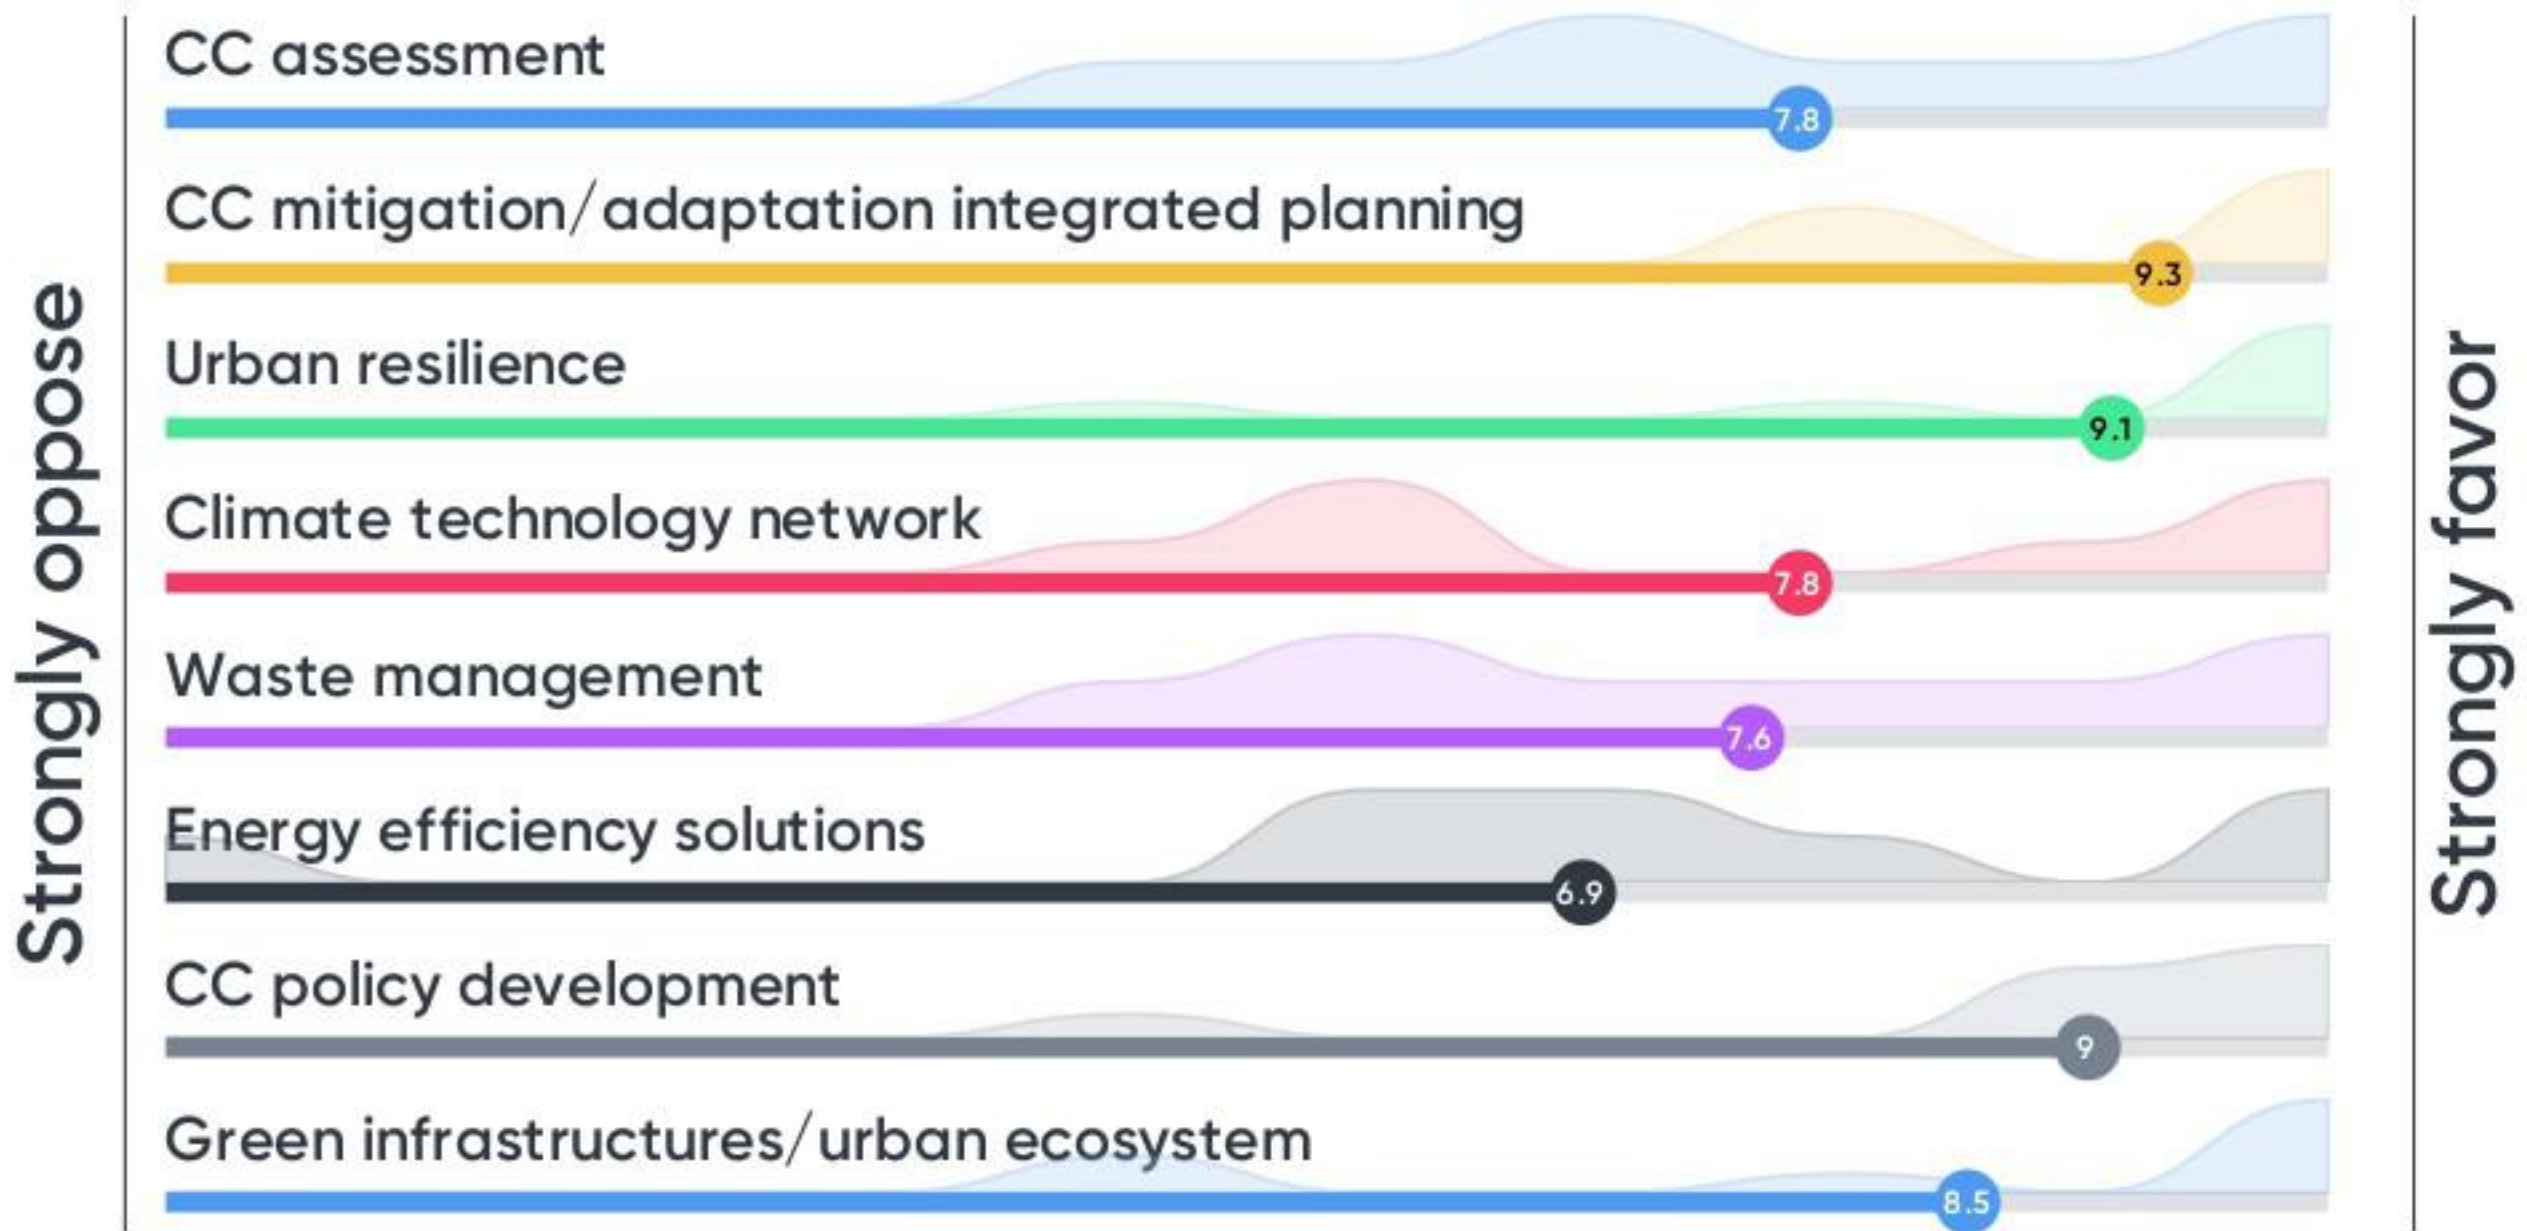

Would like to have a good cooperation with UN habitat and Arcadis to share the knowledge on resilience city planning and housing

To see actual scenarios here in Netherlands on shelter program models. Also, sharing from fellow participants

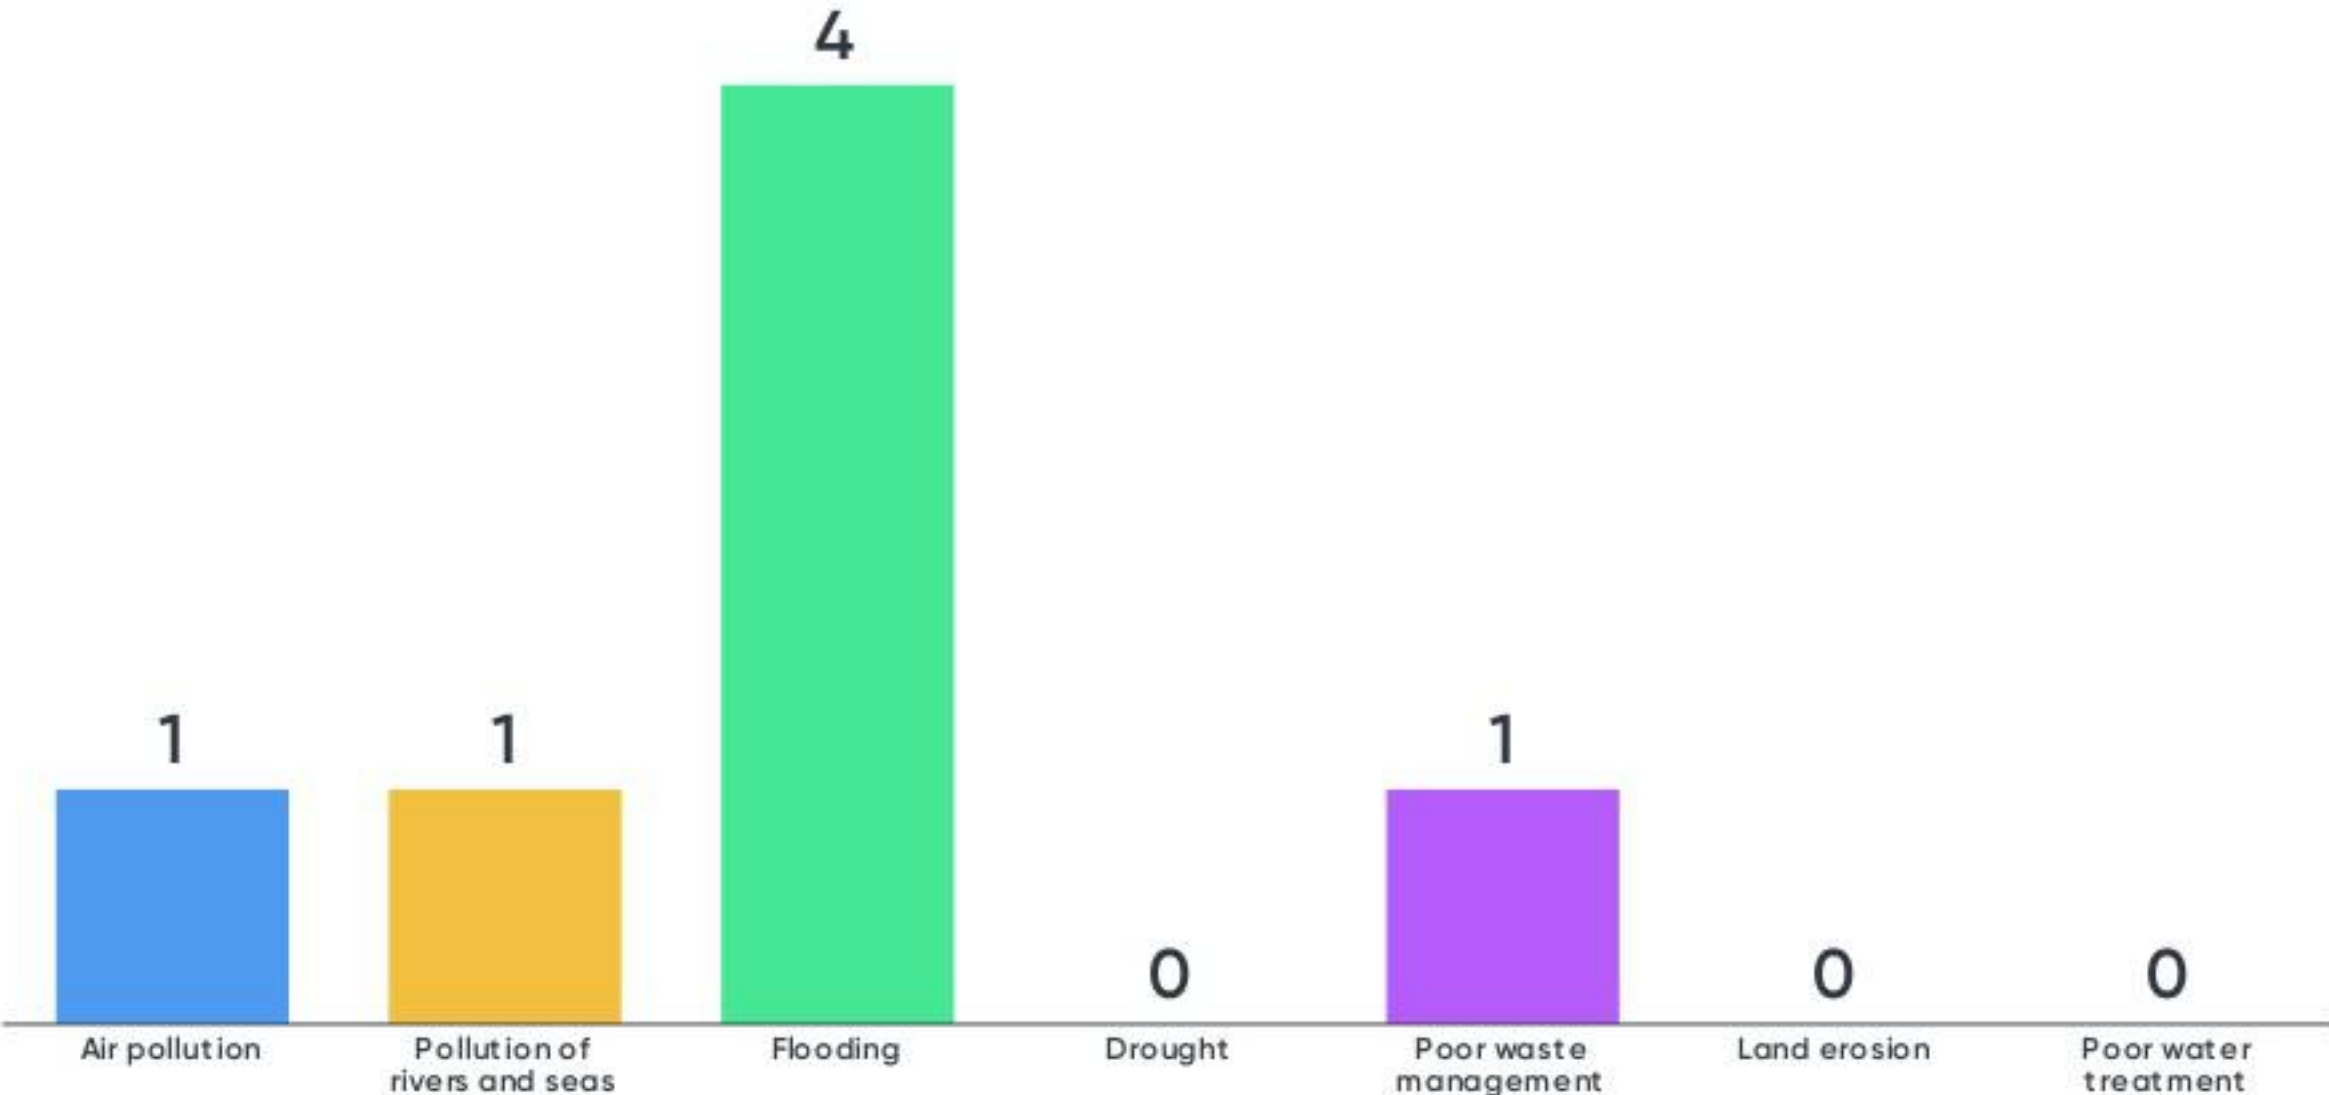

increase my network get ideas for my project proposal to ensure it can attract funding be implemented learn adaptation measures that can work in resolving challenges faced in my country get to ride a bike

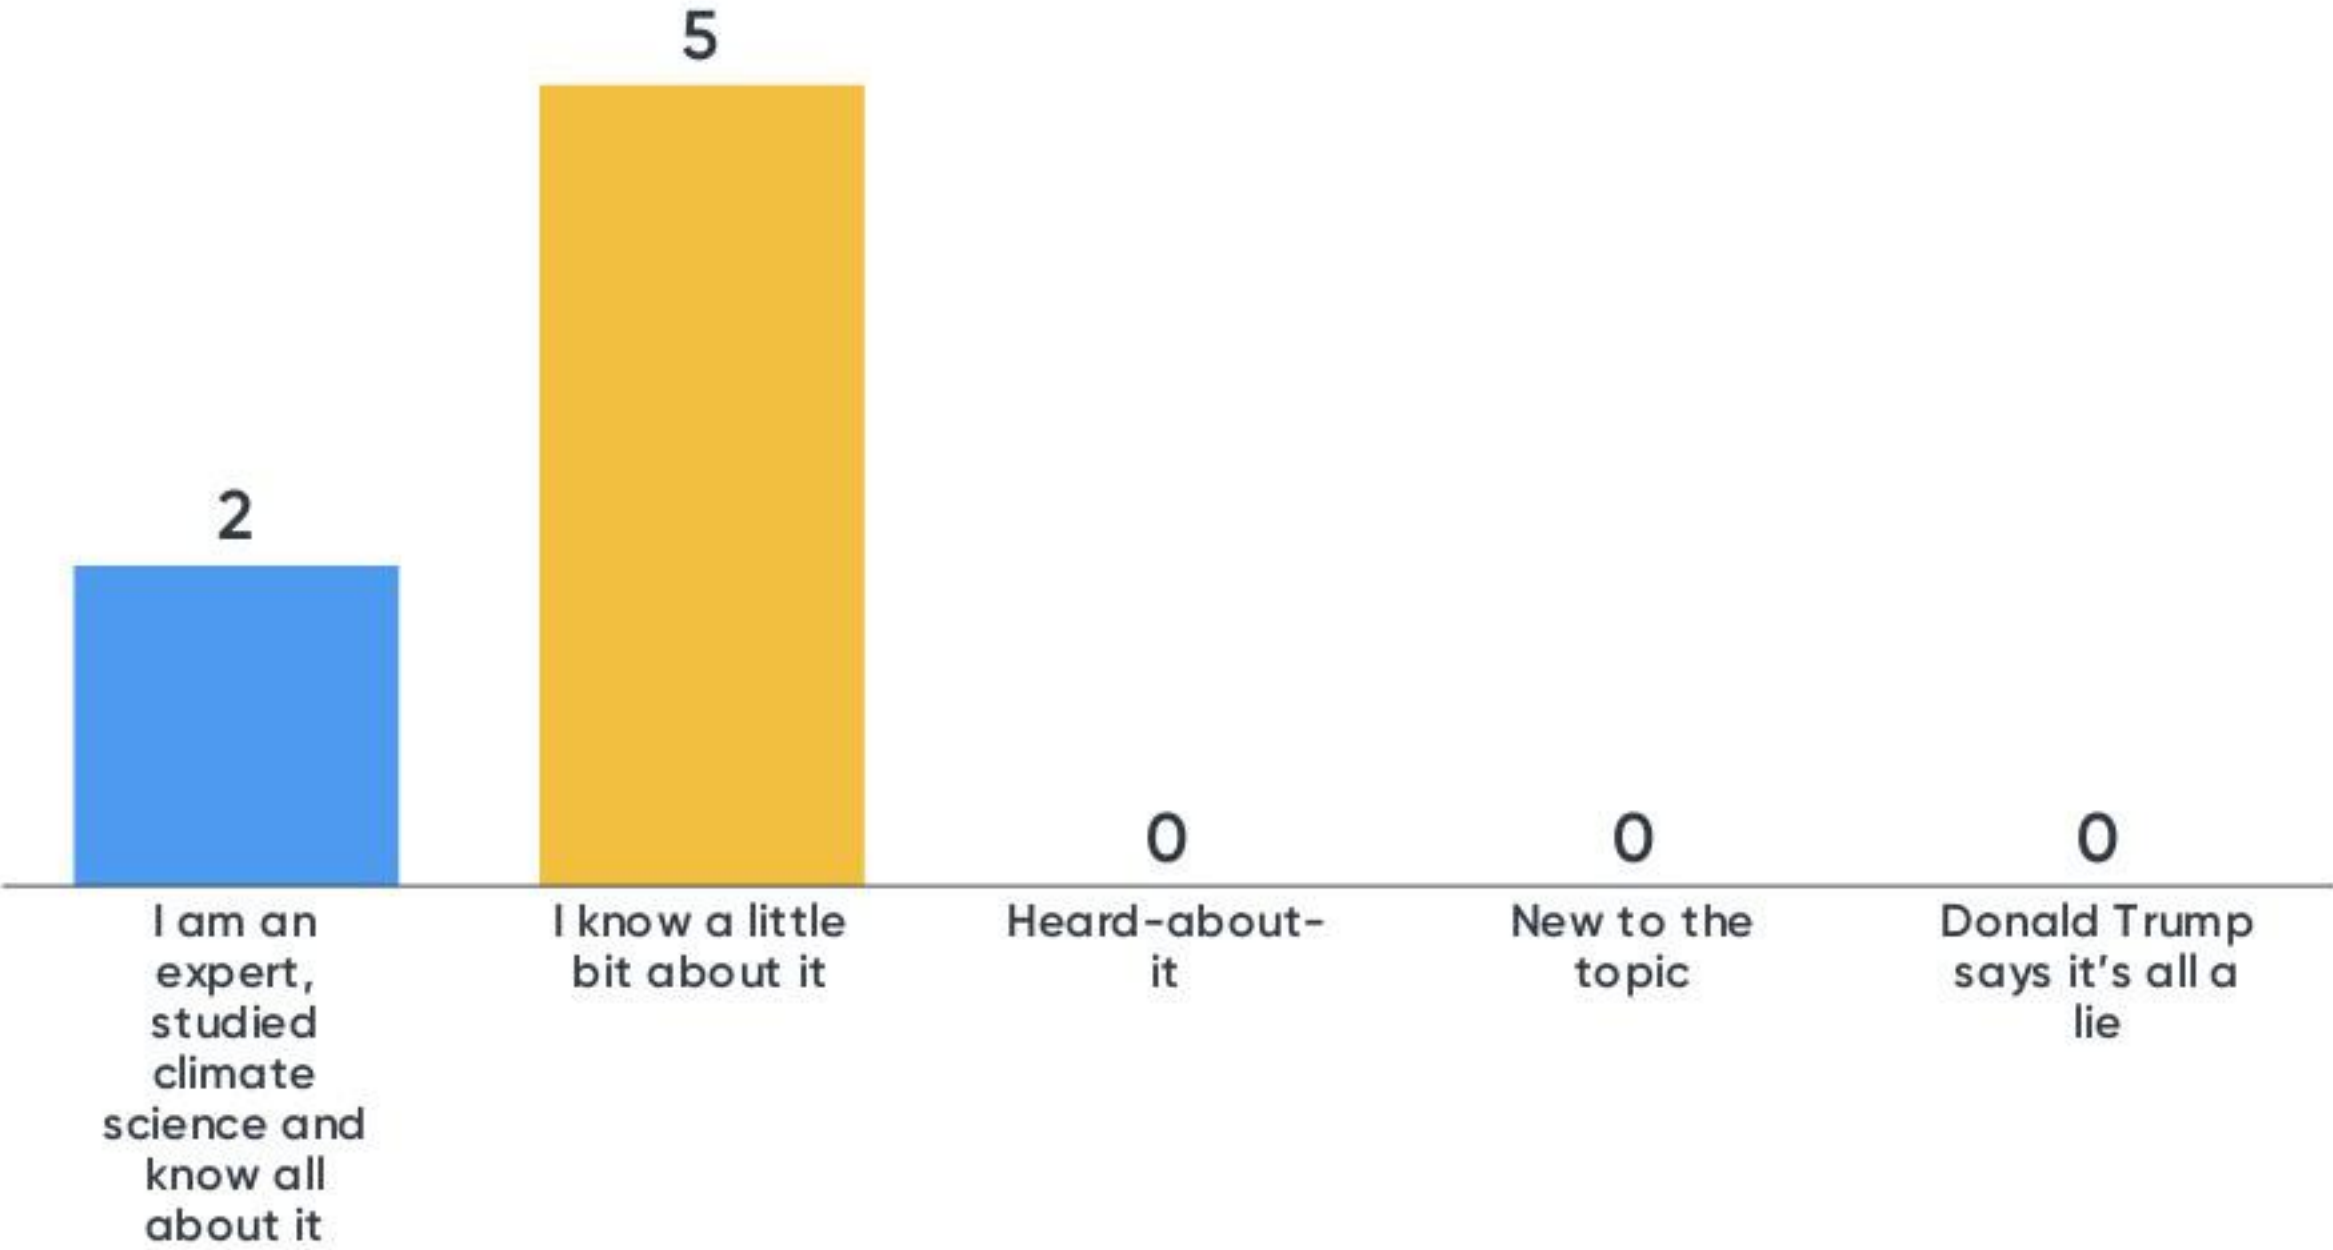

# What are your main interests/areas of focus?

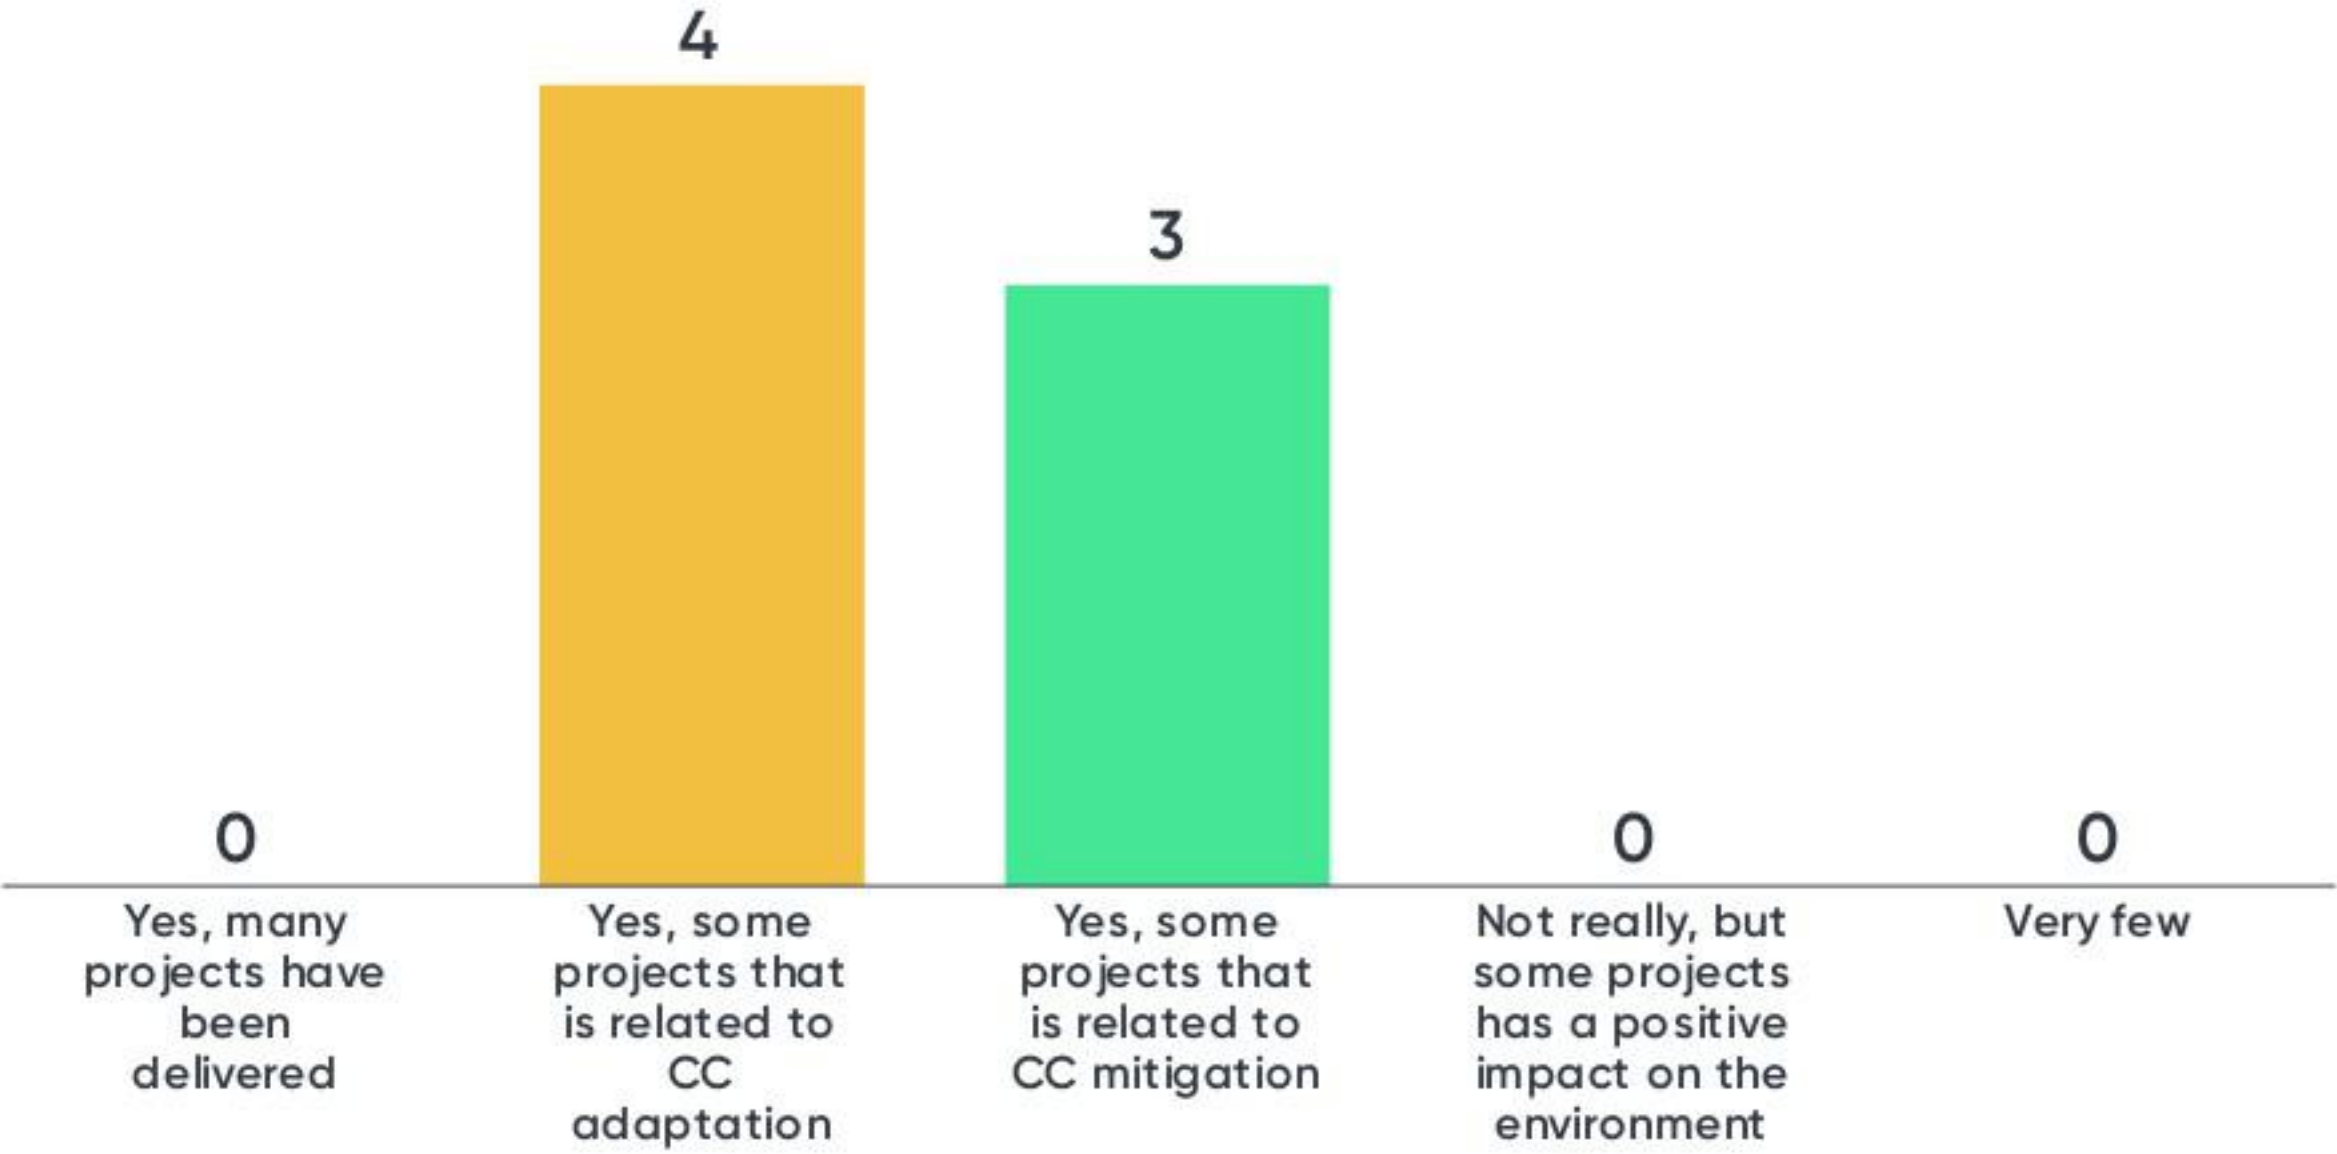

# Which is the key environmental issues that you think need to address immediately?

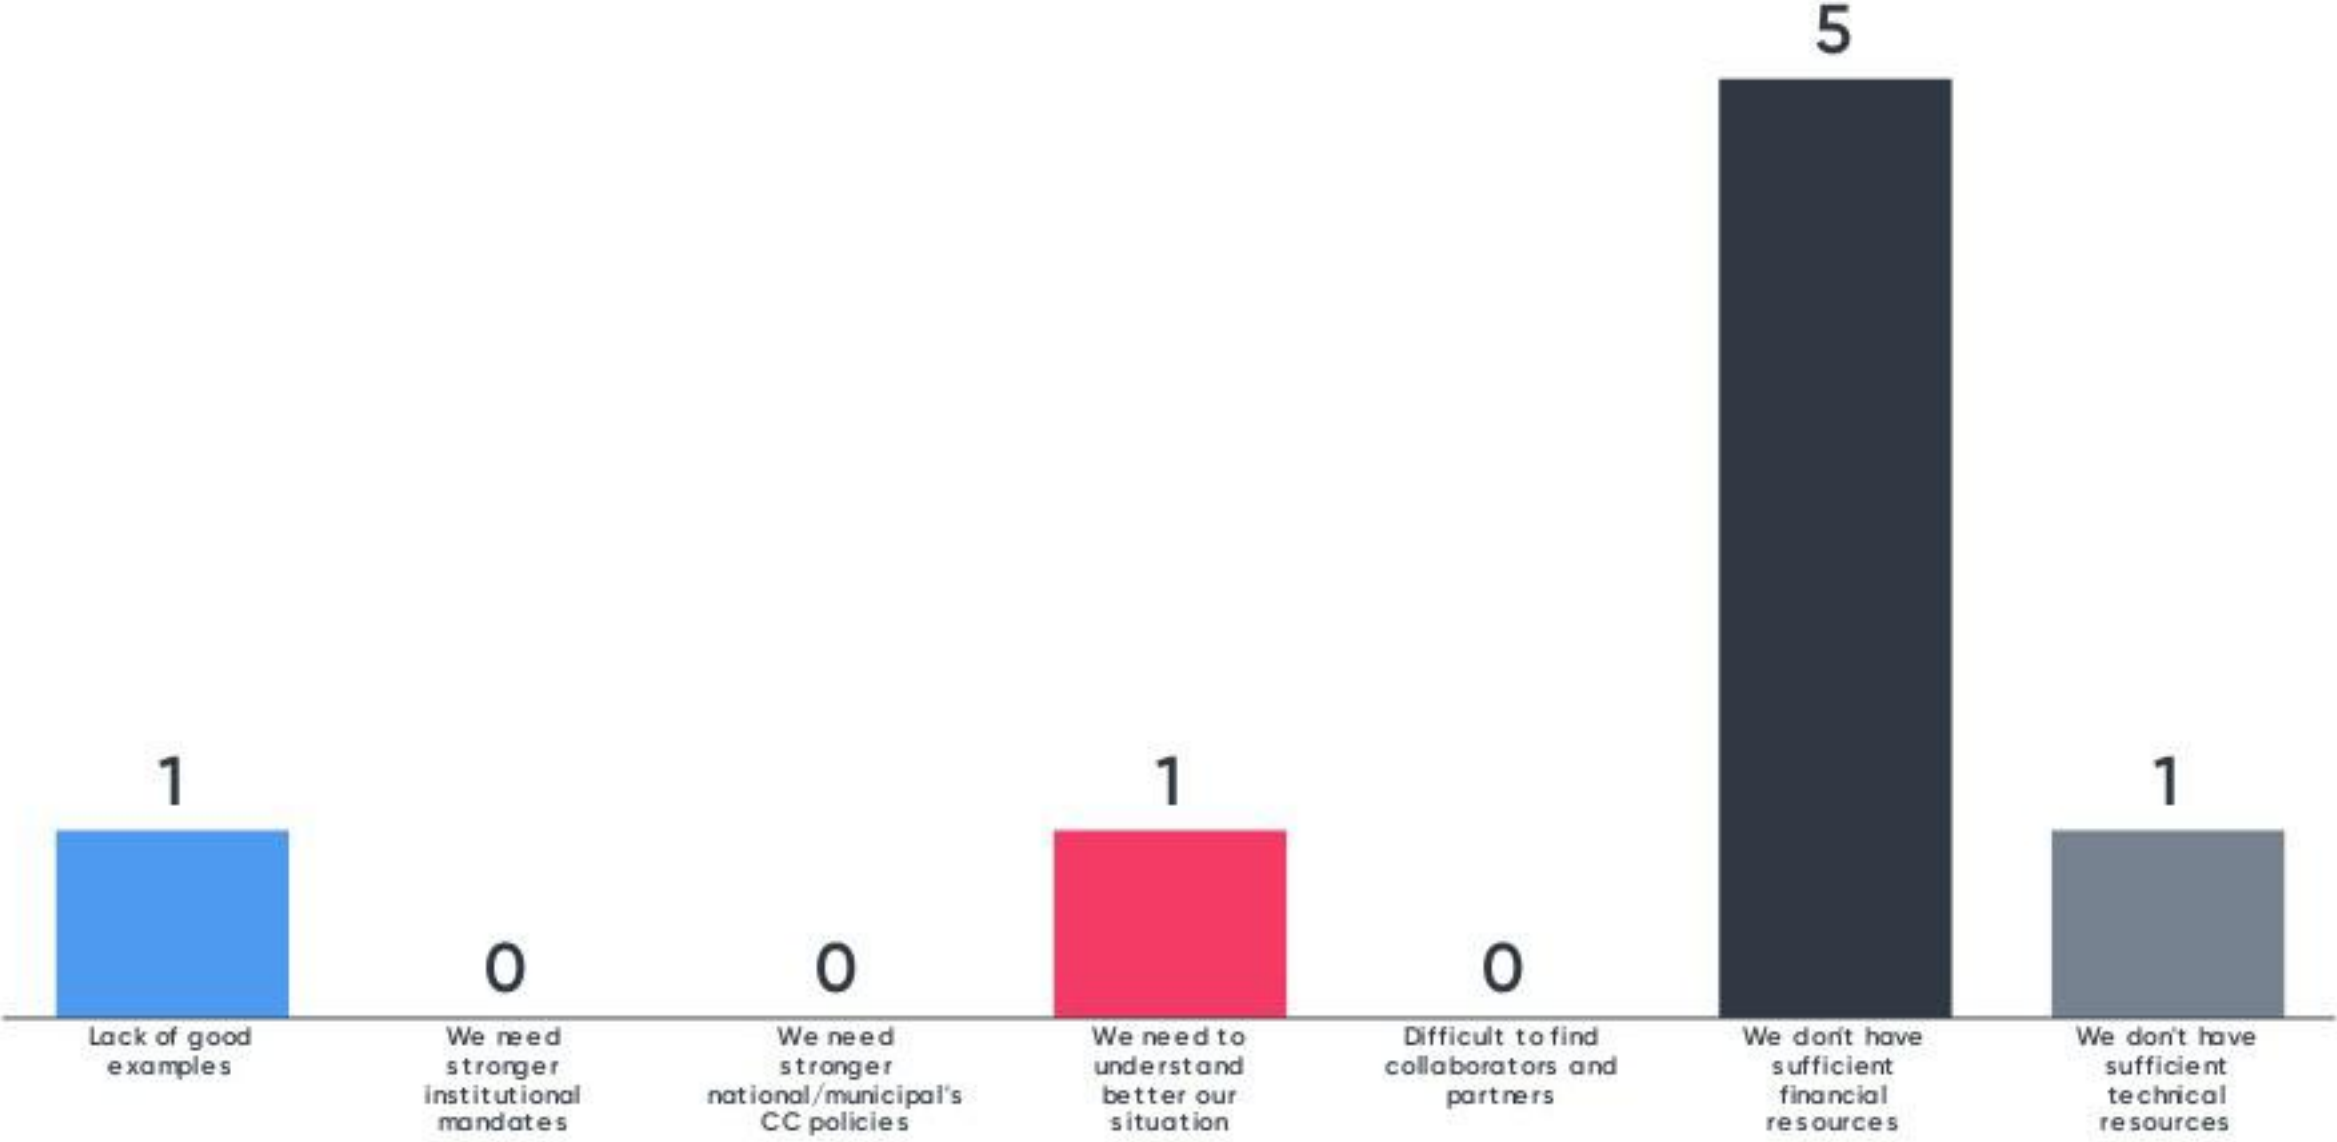

# How would you describe your knowledge level about climate change?

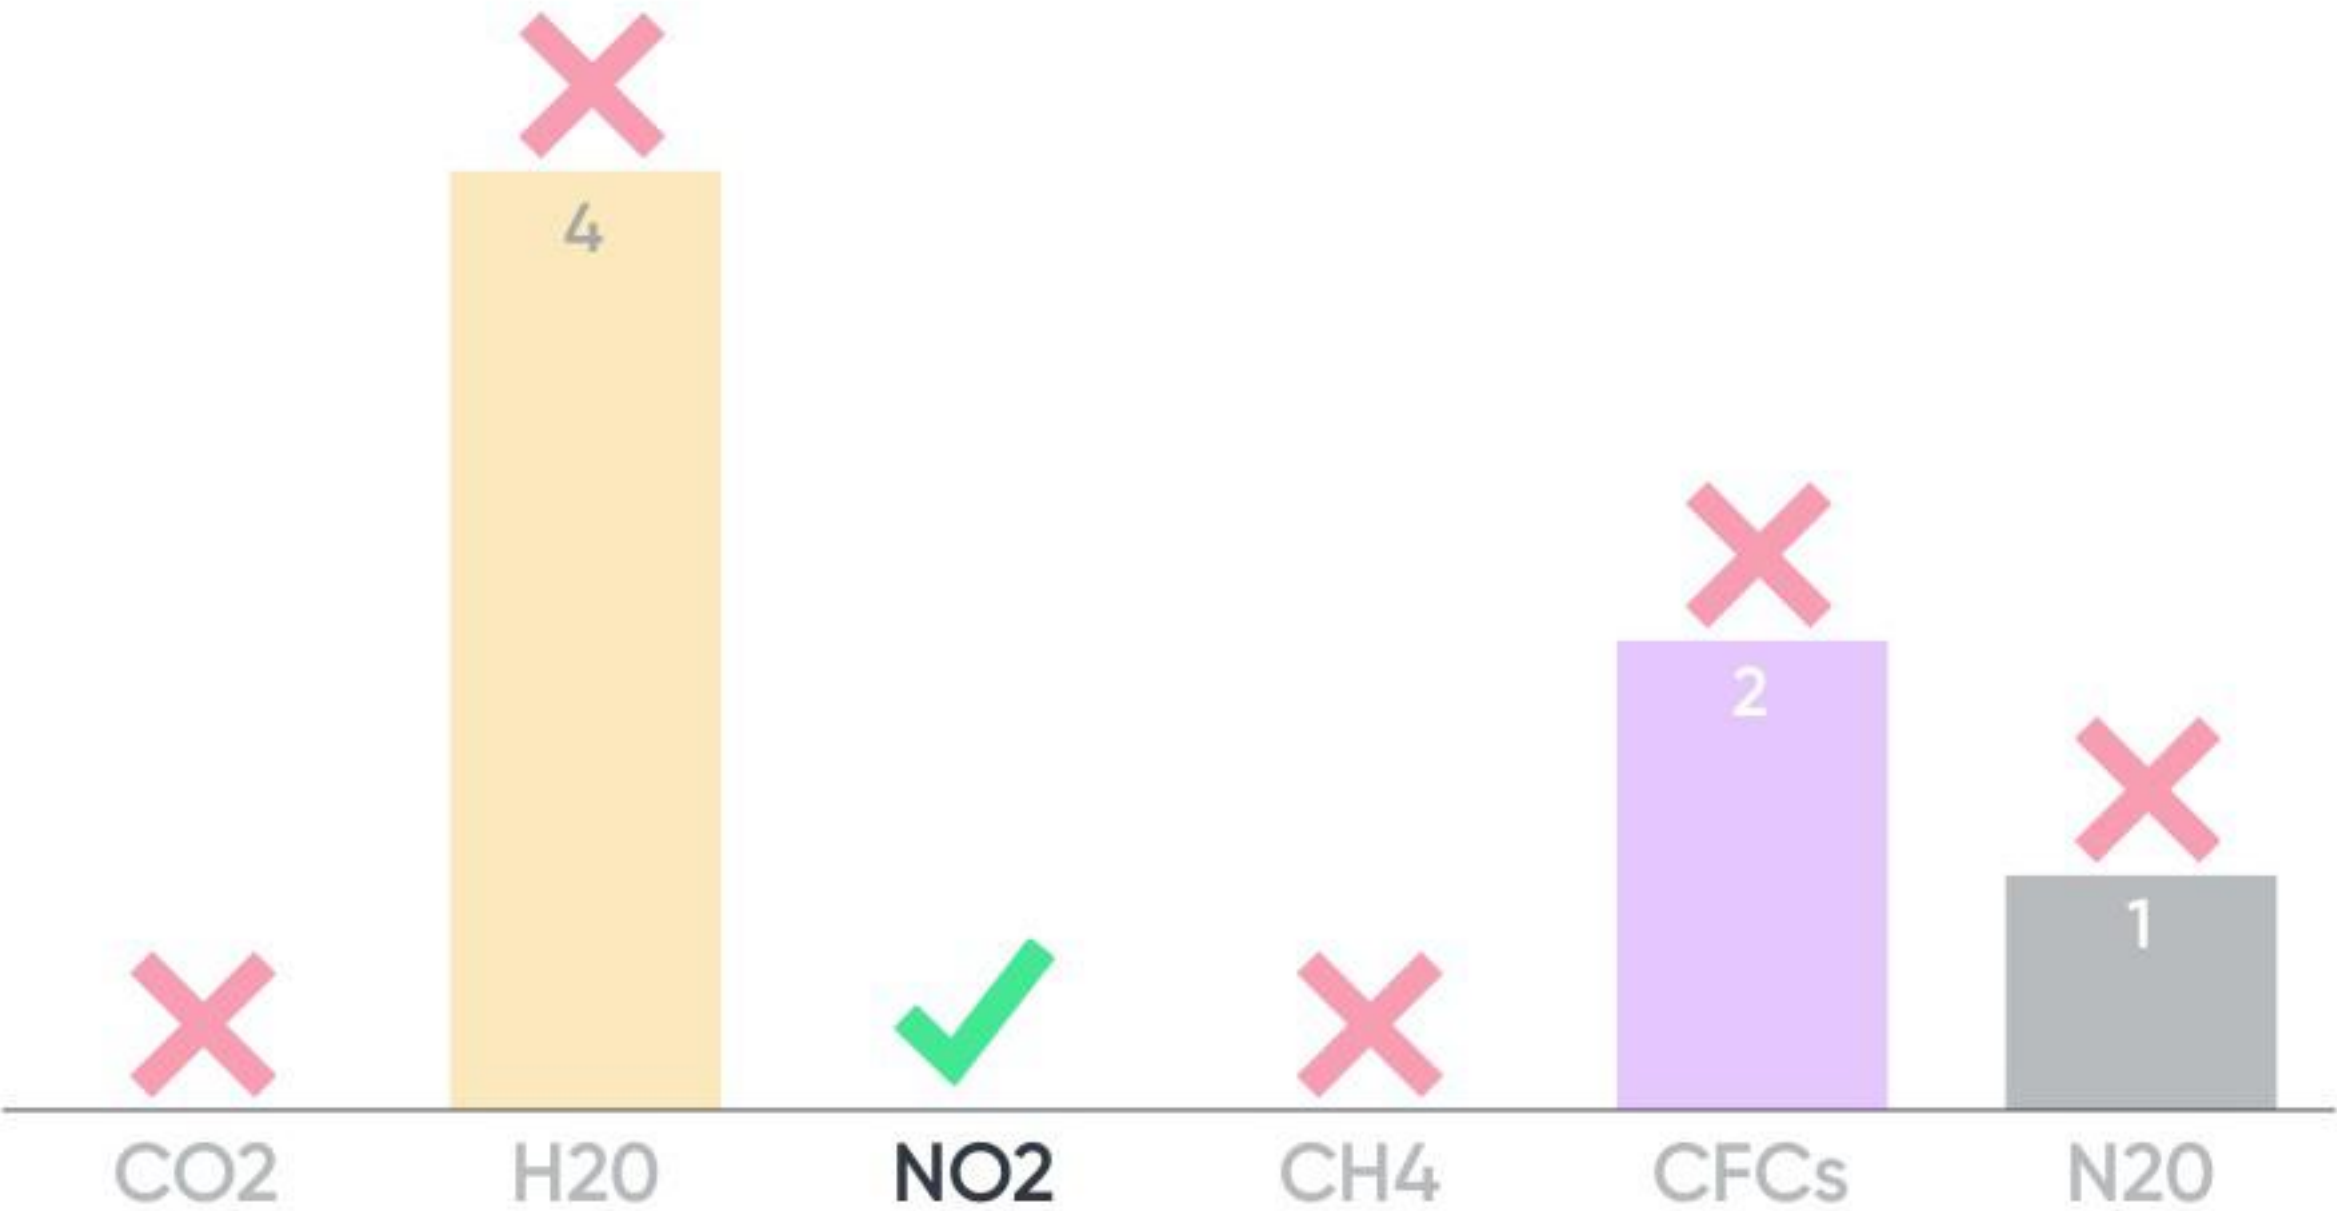

# Did your city/region implement any climate change adaptation/mitigation projects lately?

# What were the key challenges of those projects/programme(s)?

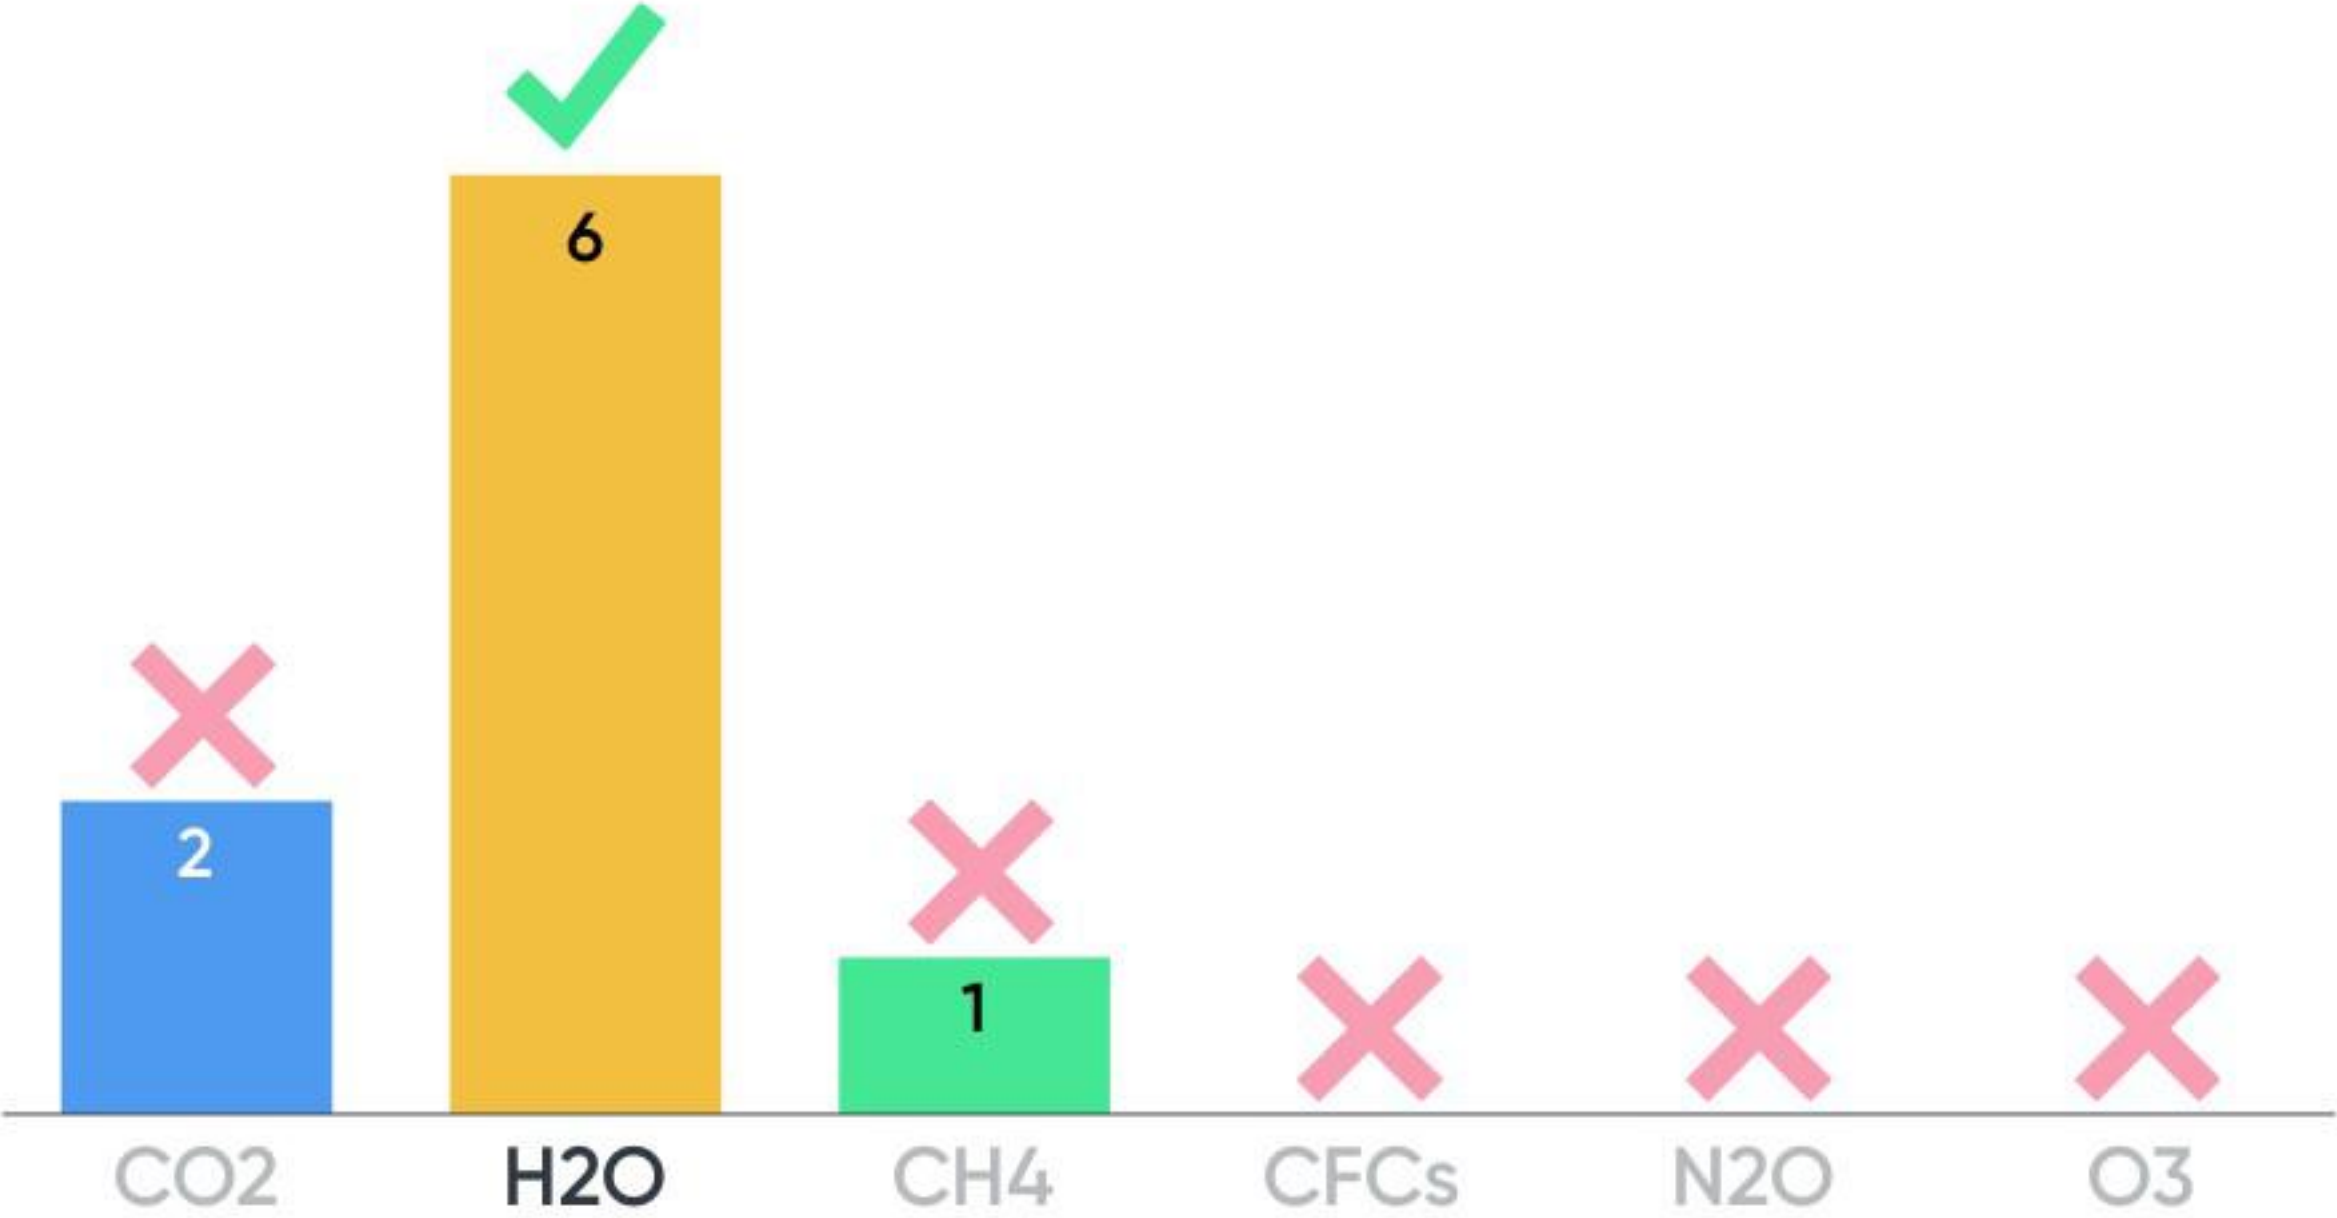

# Which of the below gases is NOT a greenhouse-gas (GHG)?

Which of the below gases is the MOST IMPACTFUL greenhouse-gas (GHG)?

**Thank you**
