UN-HABITAT Normative Mandate

**Making Knowledge, Evidences,
Guidelines and Recommendations**

Mission Statement

UN-Habitat, the United Nations agency for human settlements, helps the urban poor by transforming cities into safer, healthier, greener places with better opportunities where everyone can live in dignity.

UN-Habitat works with organisations at every level, including all spheres of government, civil society and the private sector to help build, manage, plan and finance sustainable urban development. Our vision is cities without slums that are liveable places for all, which do not pollute the environment and deplete natural resources.

UN-Habitat's seven focus areas

UN-Habitat addresses its mandate through the 2014-2019 Strategic Plan. The plan outlines seven focus areas

Sectoral Expertise: Housing 22

Slum Upgrading

"By 2002, to have achieved a significant improvement in the lives of at least 100 million slum dwellers" (Millennium Development Target No. 11)

Do	Don't
Promote good urban governance systems	Assume that slums will disappear automatically with economic growth
Establish enabling institutional frameworks involving all partners	Underestimate the role of local authorities, landowners, community leaders and residents
Implement and monitor pro-poor city development strategies	Separate upgrading from investment planning and urban management
Encourage initiatives of slum dwellers and recognize the role of women	Ignore the specific needs and contributions of women and vulnerable groups
Ensure secure tenure, consolidate occupancy rights and regularize informal settlements	Carry out unlawful forced evictions
Involve tenants and owners in finding solutions prioritizing collective interests	Discriminate against rental housing or promote a single tenure option
Adopt an incremental approach to upgrading	Impose unrealistic standards and regulations
Associate municipal finance, cross subsidies and beneficiary contributions to ensure financial viability	Rely on governmental subsidies or on full-cost recovery from slum dwellers
Design and negotiate relocation plans only when absolutely necessary	Invest public resources in massive social housing schemes
Combine slum upgrading with employment generation and local economic development	Consider slum upgrading solely as a social issue
Develop new urban areas by making land and trunk infrastructure available	Provide unaffordable infrastructure and services

1. The Challenges of Global Urbanization in a Snapshot

World Cities Report 2016

URBANIZATION AND DEVELOPMENT

Emerging Futures

UN HABITAT
FOR A BETTER URBAN FUTURE

From WCR 2016

- Population aging
- Household size decreasing
- Nearly 30% increase in population living in slums during past 24 years
- 980 million households needs adequate housing in 2010
- 1 billion new homes needed by 2025
- Increasing inequality in 75% of world cities during last 2 decades
- Increasing frequency of climate change impacts....

View of Caracas

3.

Four Features of the Global Urbanization Trends:

- (1) Demographic growth,
- (2) Inequality,
- (3) Low density growth and
- (4) Urban informality (slum formation).

3 Cities as Platforms for Equal Opportunity

Cities' Potential to Address Inequalities

- 
- Concentration of economic activity
 - Concentration of infrastructure and buildings
 - Concentration of people and social processes
 - Concentration of innovation and knowledge-based institutions
 - Opportunities for scaled-up and financially viable solutions

4.

Urban Inequality:

A real threat to sustainable urban development and economic growth.

Claudio Acioly Jr. / UN-HABITAT

Sao Paulo, Brazil

FIGURE 2.2.7: MOST UNEQUAL CITIES (INCOME-BASED GINI). SELECTED CITIES IN THE DEVELOPING WORLD (1993-2008)

Amongst the 51 most unequal cities in the world, 21 are located in Latin America

* In addition to other seven South African cities: East London (0.75), Bloemfontein (0.74), East Rand (0.74), Pietermaritzburg (0.73), Pretoria (0.72), Port Elizabeth (0.72), Durban (0.72) and Cape Town (0.67)

** In addition to other six Brazilian cities: Fortaleza (0.61), Belo Horizonte (0.61), Brasília (0.60), Curitiba (0.59), Rio de Janeiro (0.53) and São Paulo (0.50)

*** In addition to other three cities in Colombia: Barranquilla (0.57), Cali (0.54) and Medellín (0.51)

**** In addition to other two cities in Argentina: Buenos Aires (0.52) and Formosa (0.44)

5.

Urban Inequality in Latin America:

Survey in 320 cities reveal that inequality is decreasing and that local policies do matter in enabling wider accessibility to public goods and income generation opportunities.

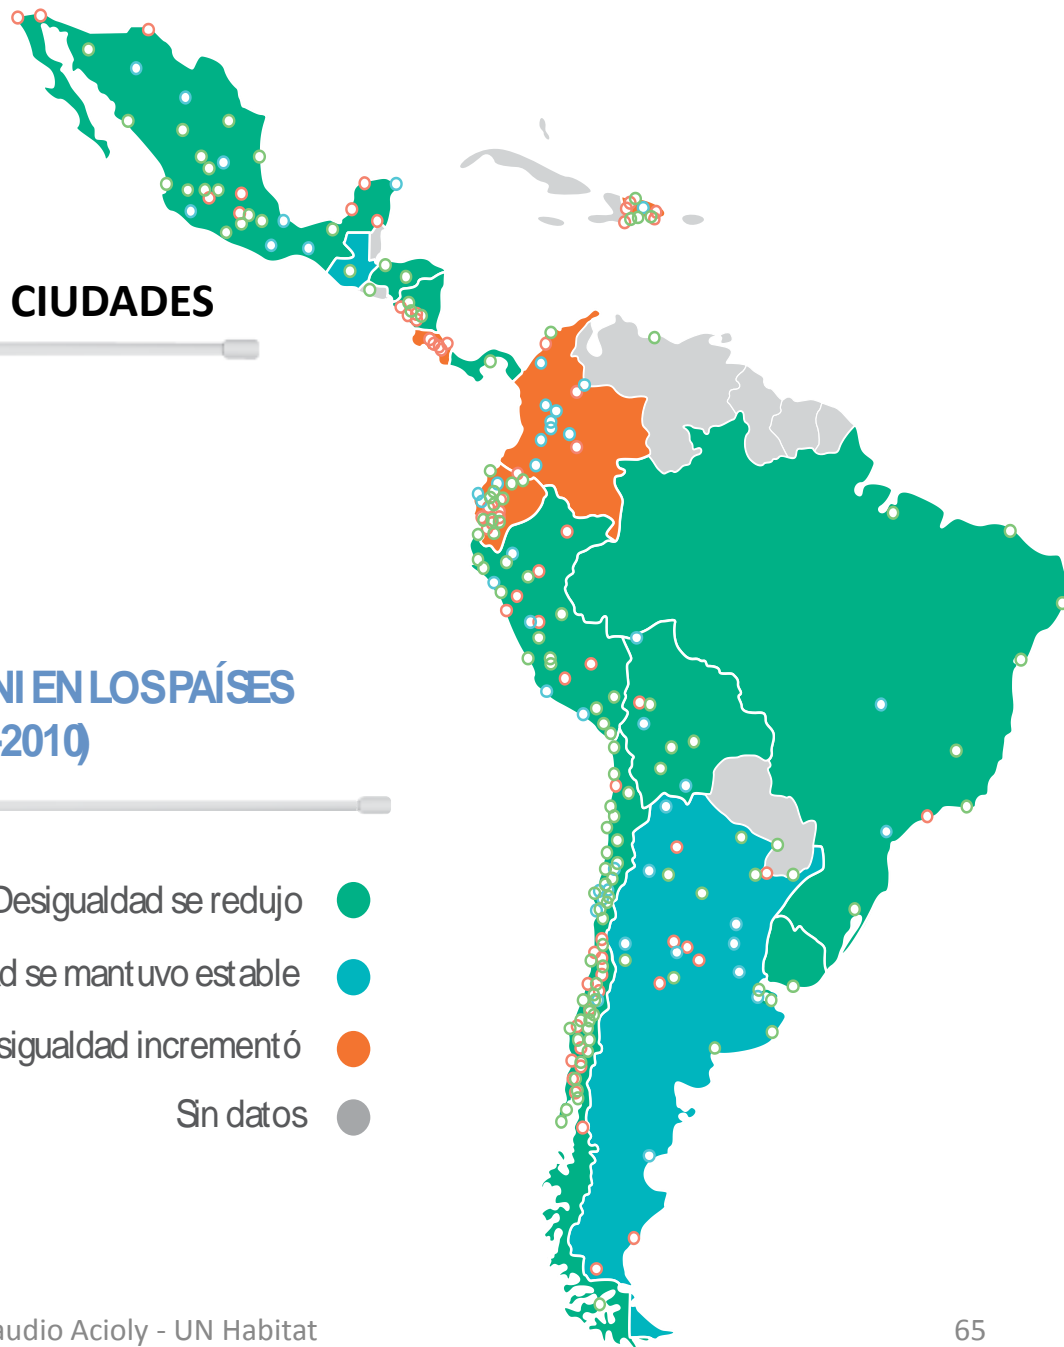

EL PAISAJE DE LA DESIGUALDAD EN LAS ZONAS URBANAS DE LOS PAÍSES LATINOAMERICANOS

EVOLUCIÓN DE LA DESIGUALDAD EN PAÍSES Y CIUDADES

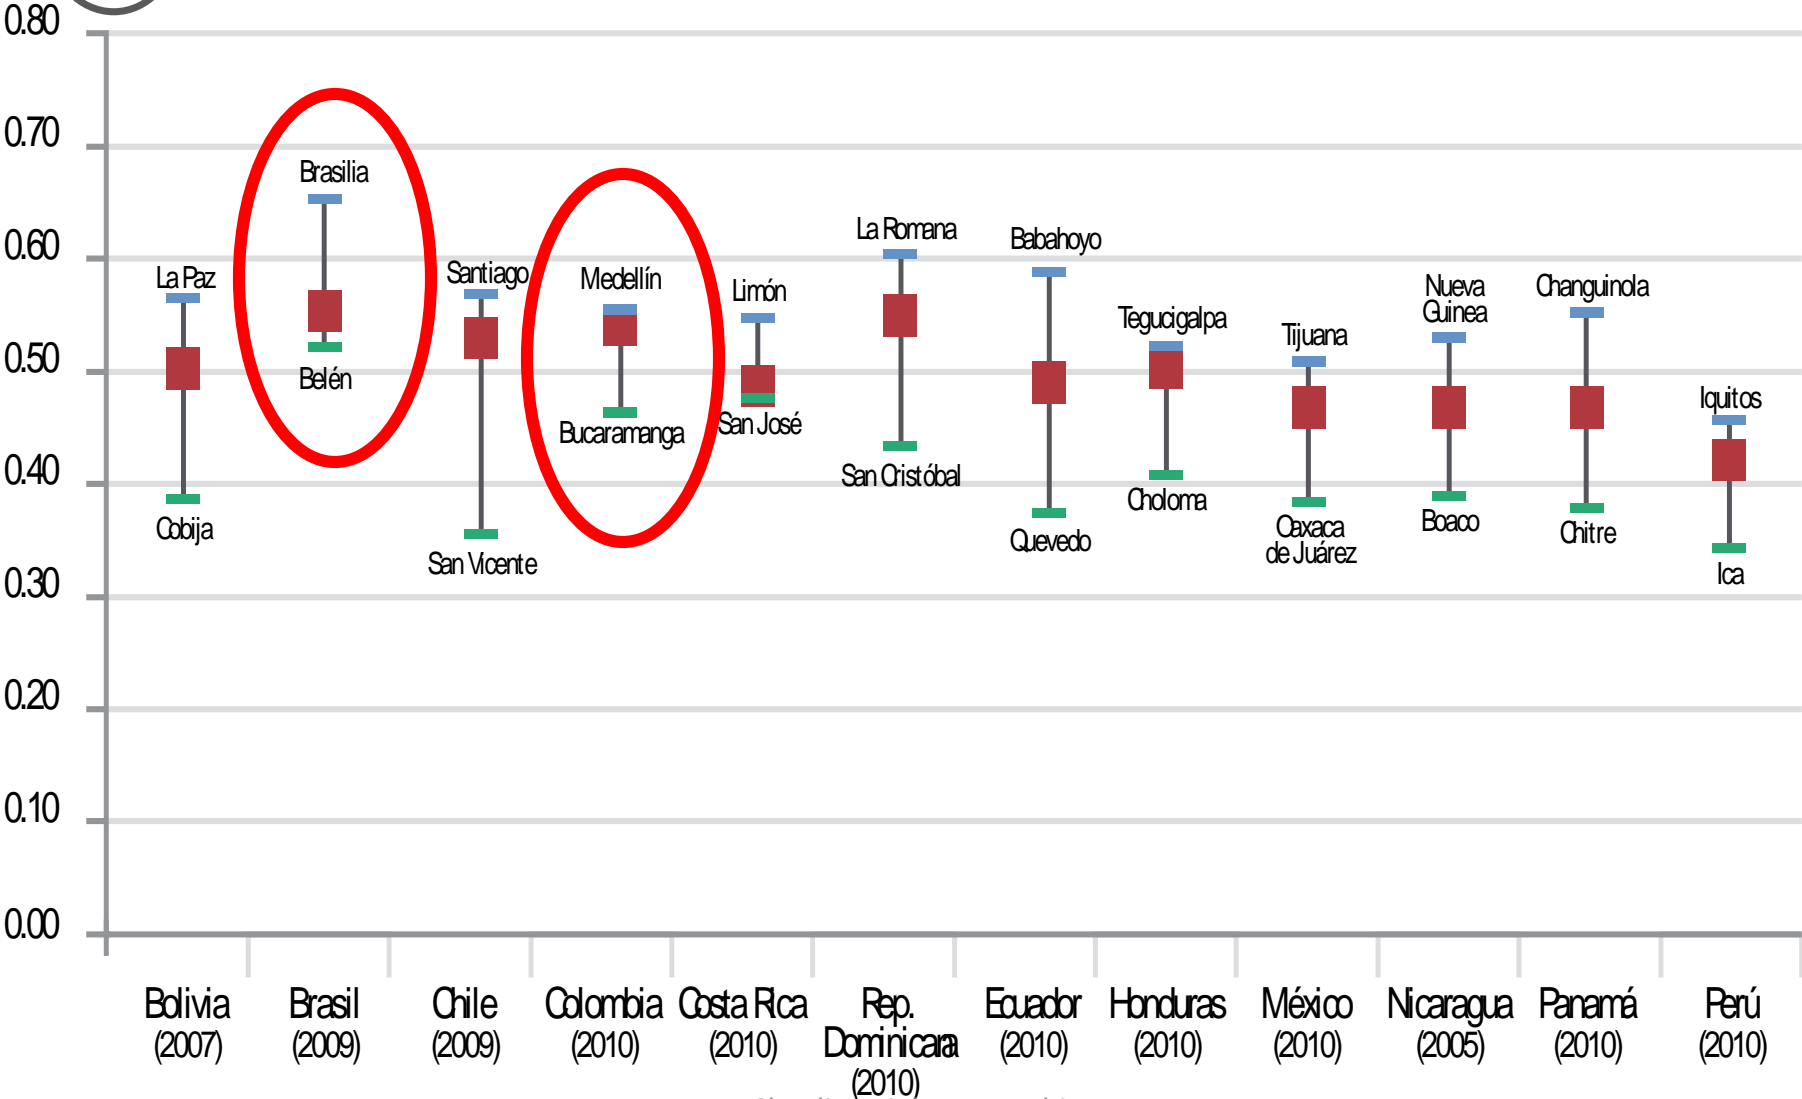

TENDENCIA DE GINI EN LOS PAÍSES Y CIUDADES (1989-2010)

- Desigualdad se redujo ●
- Desigualdad se mantuvo estable ●
- Desigualdad incrementó ●

DESIGUALDAD EN LAS CIUDADES

Claudio Acioly - UN Habitat

03/09/2018

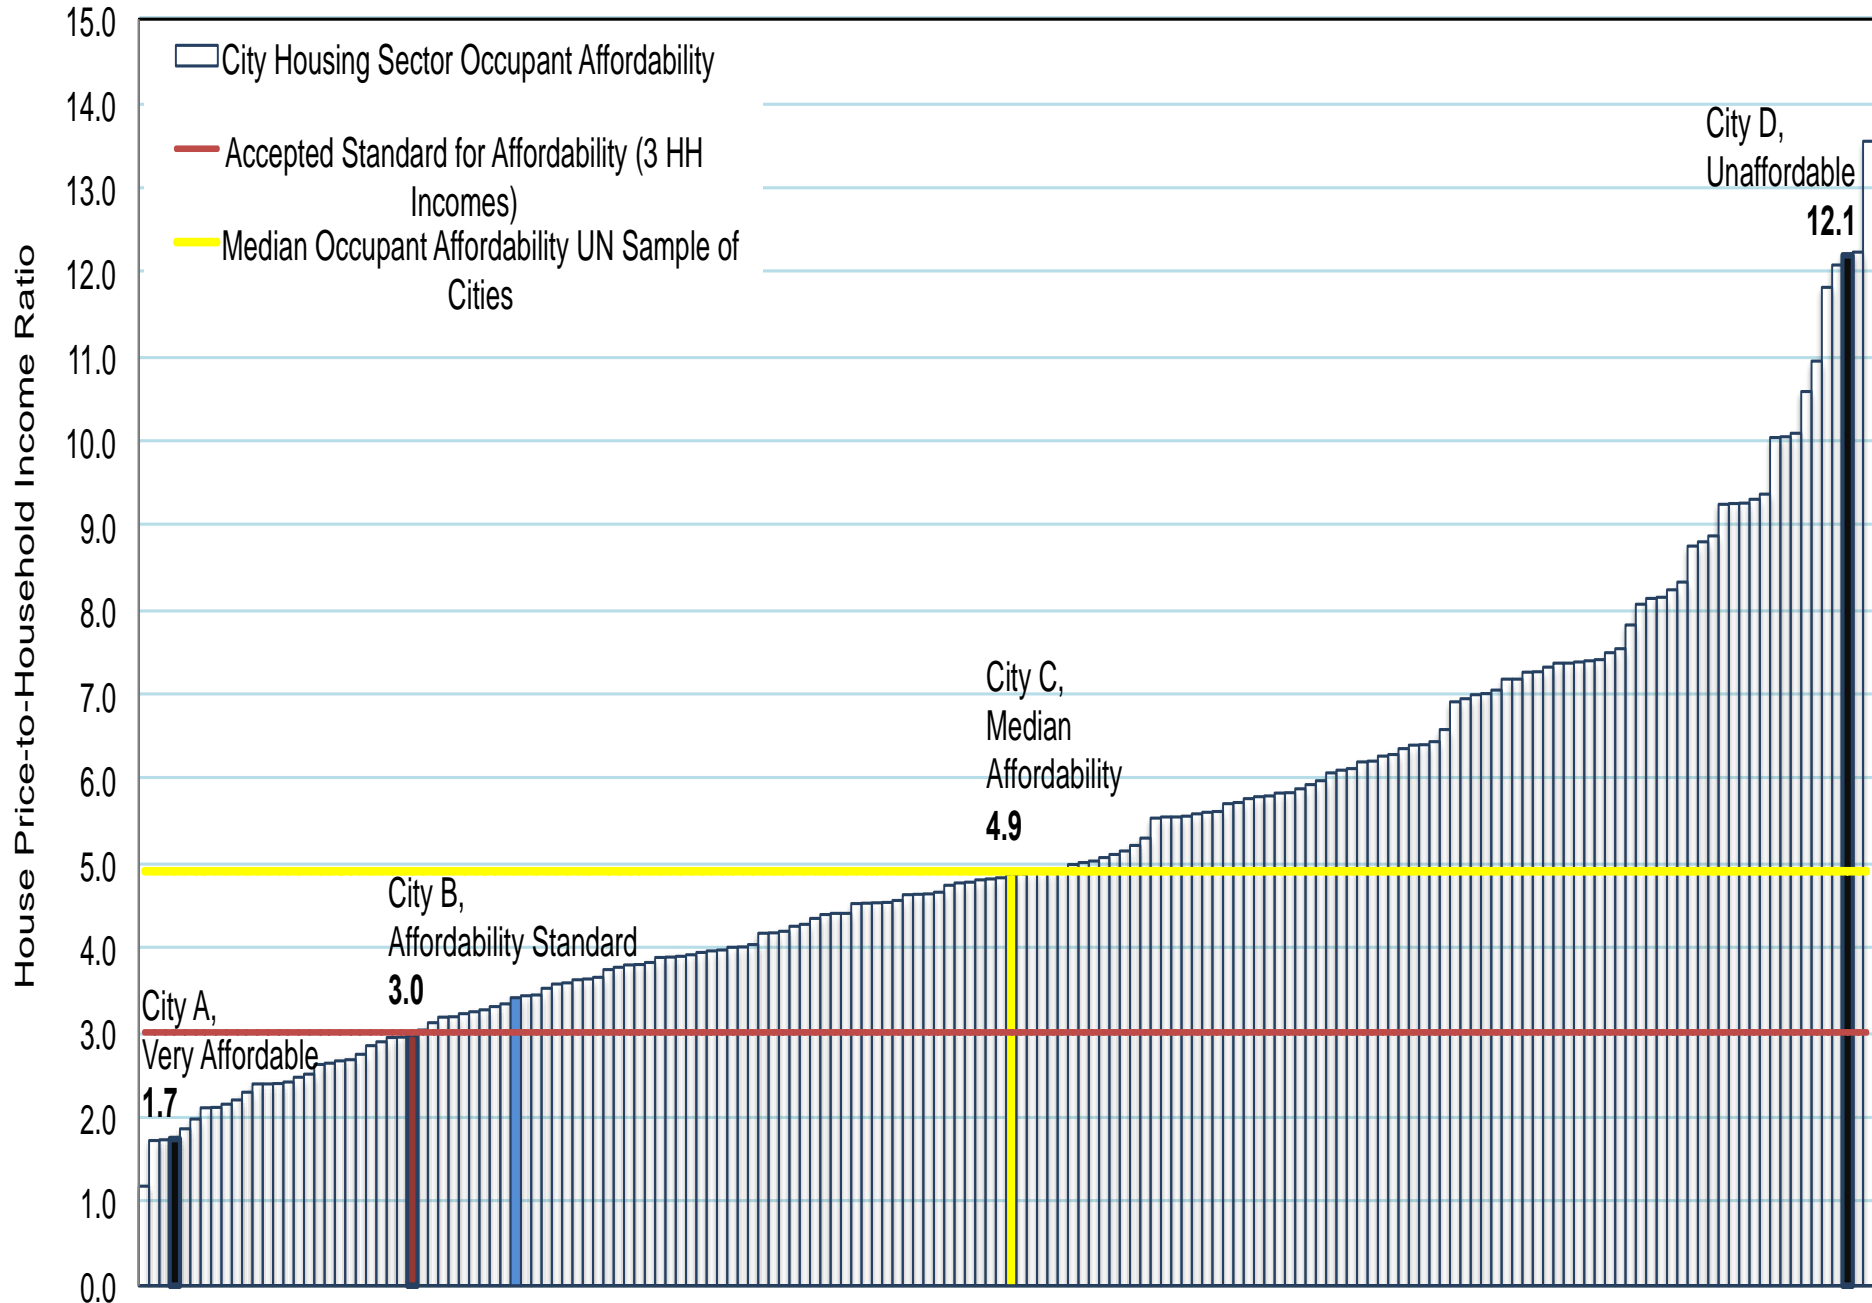

UN-Habitat has created a Global Sample of Cities made of 200 cities that statistically represent this Universe of Cities. A cooperation between UN-Habitat, University of New York and the Lincoln Institute of Land Policy.

UN-Habitat Global Urban Observatory (guo@unhabitat.org)

HOME OWNERSHIP IS LARGELY UNAFFORDABLE

Lack of Affordable Housing

1. informal urbanization

2. growth of slums:

1. physically and spatial manifestation in the urban landscape of cities
2. dynamic informal land and housing markets
3. geography of inequality and segregation

6.

Slums and Informal Urbanization:

A real threat to sustainability and a concrete barrier to sustainable cities.

URBAN STATISTICS 2013

WORLD

Total Population: **7 billion**
Urban: **3.6 billion (52%)**
Slums: **862.5 million (24%)**

AFRICA

Total Population: **1 billion**
Urban: **413 million (40%)**
Slums: **225.9 million (51%)**

LATIN AMERICA

Total Population: **596 million**
Urban: **472 million (79%)**
Slums: **113.4 million (23.5%)**

ASIA

Total Population: **4.2 billion**
Urban: **1.9 billion (45%)**
Slums: **522.7 million (30%)**

**1 out of 4 people
living in urban areas
lives in slums.**

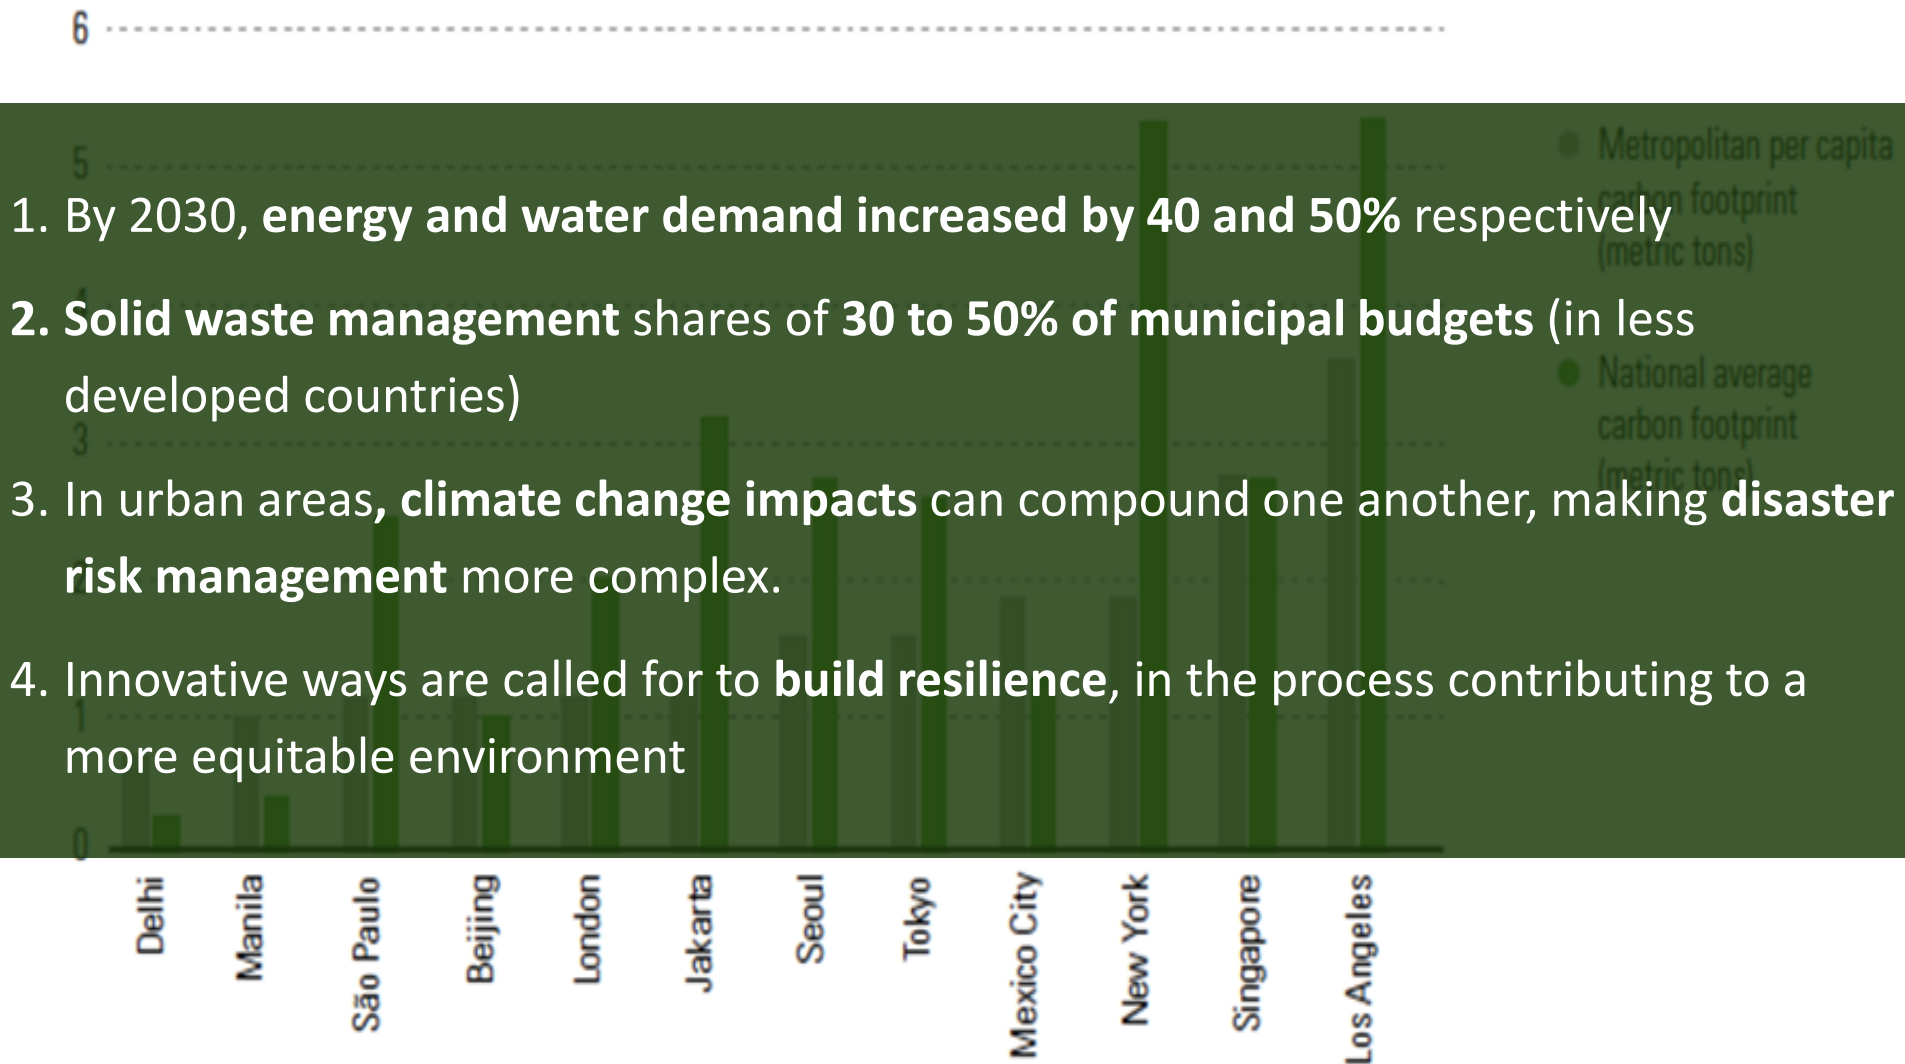

Figure 5: Comparison between individual city and national carbon footprints per capita

Source: Sovacool and Brown, 2010.

1. By 2030, energy and water demand increased by 40 and 50% respectively
2. Solid waste management shares of 30 to 50% of municipal budgets (in less developed countries)
3. In urban areas, climate change impacts can compound one another, making disaster risk management more complex.
4. Innovative ways are called for to build resilience, in the process contributing to a more equitable environment

Thank You
