

LOBATSE | IMPLEMENTATION PLAN

Shelter Academy 2019

1. Challenges

What are the challenges in your city?

- Lack of clear policy direction at national and local level on how cities can develop affirmative actions to address climate change mitigation and adaptation;
- The town being situated in a valley resulting in floods;
- Improper waste management.

2. Solutions

List of solution: what could help you to face your city's challenges?

Challenges	Solutions
<p>1. Lack of clear policy direction at national and local level on how cities can develop affirmative actions to address climate change mitigation and adaptation;</p>	<p>Vigorously advocate for the cooperation on climate adaptation and mitigation into the national and local policies</p>
<p>2. The town being situated in a valley resulting in floods;</p>	<p>Conduct a Vulnerability Assessment, capacitate the stakeholders and develop a Water Management Master Plan</p>
	<p>Make stormwater management one of the building plan permission requirements. Introduce nature based solutions.</p>
<p>3. Improper waste management.</p>	<p>Waste Management Master Pal.</p>

3. Implementation plan

Short term actions (2019 – 2020)

- Water Management Master Plan / Waste Management Master Plan;
- Advocating for policy review;
- Disilting of stormwater tunnels.

Long term actions (after 2020)

- Implementation of the master plans (water and waste);
- Implementing nature based solutions;
- Having policy and specific budget for climate adaptation and mitigation.
