

HOUSING BAROMETER

Guide to answer the housing barometer
UN-Habitat Country Programme
Executive City Lab
Addis Ababa, Ethiopia, March 2019

The Housing Barometer is a tool to support a rapid analysis of the housing sector. It provides a quick overview of the housing sector that feeds directly into the housing policy formulation process. The Housing Barometer relies on qualitative assessments rather than data and empirical evidences. It expresses the perceptions of policy makers, decision makers and housing practitioners about the performance of the various subsectors of the housing sector.

1. Place the requested information on the "User's information" page.
 2. Switch to the "Institutional and Legal Framework" section.
 3. Read the 15 questions as well as the scoring table and indicators.
 4. Fill in the green "scoring" column next to the questions. Click on the box and select one of the options on the drop-down menu.
 5. Once the section is finished, continue with the other component pages.
 6. At the end of the six components, you will find the housing barometer for your country on the "summary" page.
-

At the end of the exercise, write down your notes in the provided PowerPoint template.

1. Enter your personal and country information.
2. Place a screenshot of your result.
3. Write down your exercise conclusions and findings. Conclusions should be maximum of 5 bullet points.
